

myriaCross editor

Copyright © 2011-2017 Pascal Souchet aka maxpaul

History of changes :

Version 1.61 - march 27, 2017

Addition:

- Main window shortcuts ⇒ open folder dialog.
- Open file type *myriaCross libraries*.
- Scale selection when creating detail windows.
- Rendering effect *Bubbles*.
- Functions tooltips in quilting editor.
- Tooltip for quick colours access picture in available colours panel.
- Radius setting for rounded rectangle charm outline.
- Charm effects *Deformed*, *Filter 2*, *Mosaic 3* and *Outline 4*.
- Reference colour palette *Scalable Vector Graphics*.

Improvement:

- Pattern, backup and installer files have different icons.
- *Please note this* and *Please confirm* windows now able to fade in and out.
- Enhanced floss and bead usage export to *htm* or *html*.
- Saving to embroidery now requests maximum length for stitches.
- Added *M* and *MR* buttons in outline colour in and bevel dialogs.
- Added the ability to work on a single word in 24-bit tool *Break down*.
- Added *Smooth* option in 32-bit tool *Make from white on black + emboss*.
- Better shadow quality for 32-bit tool *Make from white on black + emboss*.
- Added *Brightness mask* options in 32-bit tool *Make from colour + grey*.

Correction:

- Possible crash or bug when using menu *Window/Whole pattern*.
- Rendering effect could be running though disabled.
- Possible extraneous spaces in colour palette tooltips.
- Did not recompute 3D text shape after size variation amount change.
- Could not create rotated transparent texts.
- Display was not updated:
 - For charms having an effect when adjusting their picture.
 - For charms when applying same effect after merging picture w/effect.
 - For calendars having an effect when editing them.
 - For colour keys having an effect when editing palette.
- No more allowed merging colour key or calendar picture w/effect.

Plus changes made in version 1.60, see below:

Version 1.60 (unreleased) - december 29, 2016

Addition:

- Rendering effects.
- 24-bit tool *Emboss*.

Improvement:

- Hovering over the clock now displays:
 - Current date
 - Seconds in current time
 - Elapsed time since startup
 - Remaining time before warning
- Added line style for markers in rulers.
- Added *Contrast* option in charm effect *Emboss 1*.
- Added *Displacement* and *Cut up* options in 24-bit tool *Grey layers*.
- Added *Contrast* and *Smooth* options in 24-bit tool *3D outline*.
- Better quality of the grey gradation in 24-bit tool *Thicken*.

Correction:

- Colour settings now always enabled in the outline colouring in dialog.

- Possible crash when using tool *Make 32-bit from greyscale + emboss*.
- Bug in filename when selecting a file to export floss usage to.
- Bug preventing to be warned in 30 minutes.

Plus changes made in version 1.59.01, see below:

Version 1.59.01 (unreleased) - november 26, 2016

Addition:

- Menu *Edit/Selected charm/Picture/Copy to clipboard: same+colour+outline+bevel*.
- Menu *View/Objects/Shadow position*.
- Menu *Tools/More/24-bit picture tools*.
- Option *Allow displaying the charm light* in the object properties dialog.
- Charm effect *Filter*.
- Texture *105* for canvas texture and texture effect.

Improvement:

- Option *100% printable page* in new pattern size selection menu.
- Higher quality when making a charm from selection/object.
- Excessive coloured in outline size was decreased.
- Better quality of the charms shadow gradation.

Correction:

- Did not handle *B4/B5/Executive/Legal/Letter/Statement/Tabloid* for some printers.
- Bug when selecting a library outline mask more than one time: computed preview again.
- Bug when making charm from selection if shadowed beads.
- Bug with *Smooth* option in charm effect *Emboss 3*.
- Possible crash when creating a round outline mask.

Version 1.59 - september 27, 2016

Changes made in version 1.58.01, see below:

Version 1.58.01 (unreleased) - september 25, 2016

Addition:

- Menu *Edit/My selected motif/Motif names per language*.
- Menu *Tools/Options/Behaviour/Embed charm effects in pattern file*.
- Option *Rename* in the charms library creation tool.
- Button *MX* (memory exchange):
 - In the charm gradient colours dialog.
 - In the charm effects dialog.
- Textures *103, 104* for canvas texture and texture effect, outline mask *513*.
- Charm effects *Frame 1, Frame 2, Layers 2, Wound* and *Rainy*.
- Option *Layers 2 + ...* in charm effect *Drawn 1, Drawn 3* and *Emboss 3*.
- Menu *Help/About* ⇒ *Made in France* message.

Change:

- Menu *Edit/Available colours* renamed as *My selected available colour*.

Improvement:

- You can now drag and drop files onto pattern or text windows.
- Completed translation of motifs names for preset libraries.
- Motif library *.mcp/l* language files:
 - Alternate syntax to get smaller files.
 - Now loadable from menu *File/Open/*.
 - Now included in backups.
- Enhanced grid texture *48*.
- Rewritten charm effects dialog (76 KB smaller executable).
- Increased speed performing morphology erosion and dilation.

Correction:

- Possible crash when closing a pattern window.
- Possible crash when using 32-bit tool *Colourize*.
- Partly loadable text files (>64KB) can no more be edited.
- Possible bug when opening a text file twice.
- Possible bug when renaming a library of motifs or charms.
- Possible bug when chaining charm effects.

Version 1.58 - july 26, 2016

Addition:

- 32-bit picture tool *Create 32-bit from white on black + emboss*.
- Charm effect *Colours 3* to adjust colours balance.
- Option *Smooth* in charm effects:
 - *Colours 2, Drawn 1, Drawn 2, Emboss 3* and *Outline 1*.

Improvement:

- Ability to get only greys in charm effect *Colours 2*.

Plus changes made in version 1.57.01, see below:

Version 1.57.01 (unreleased) - june 30, 2016

Addition:

- New pattern templates *2D: Polygon* and *2D: Rectangle*.
- Brightness and contrast setting for textured mats.
- Rendering brightness option based on objects Z-position.
- Menu *File/Copy to clipboard/Brightness mask (rendering)*.
- Menu *Tool/Filling/Fill with a true motif*.
- 32-bit picture tool *Change transparency*.
- 32-bit picture tool *Create 32-bit from white on black*.
- 32-bit picture tool *Create 32-bit from greyscale + emboss*.
- 32-bit picture tool *Make charm*.
- Edge detectors (internal/Sobel/Kirsch) in charm effect *Drawn 1*.
- Pattern variable *\$WhatIsEx* in more pattern information.
- Cross stitch motifs library *Christmas*.
- Charms library *Adhesive tape*.
- 7 more canvas textures and 16 more transparency masks for charms.
- Outline masks *627, 628*.
- Frames *Golden 3* and *Golden 4*.

Improvement:

- Better rendering of charms as shades of yellow.
- Increased speed redrawing charms with effects.
- The symmetry mode now modifies symmetrical items too:
 - When deleting a backstitch, a French knot or a bead.
 - When changing a backstitch colour, line or curve style.
- Inside the quilting editor:
 - The *Create markers at point* mode activates the display of rulers.
 - Moving the mouse outside the edit area hides the cursor axes.
- Now remembers DPI setting in *My [transparent] charm* dialog over sessions.
- Specifying your own charm outline mask:
 - New menu to compute threshold V. percent of darker pixels.
 - New option *Erosion/Dilation* in the black and white conversion dialog.
 - Black and white masks are now stored as 1-bit pictures ⇒ smaller file.
- Creating a round or square repeated charm outline mask:
 - Colours smoothing question now appears only for round colour masks.
 - Black and white masks are now stored as 1-bit pictures ⇒ smaller file.
- Ability to move and duplicate items in the *Charms library creation tool*.
- Ability to clear transparency in 32-bit picture tool *Remove transparency*.
- Ability to set transparency in tool *Make 32-bit with stained-glass effect*.
- Now defaults to last used 32-bit picture tool button in current session.
- More info *Content* returns *Scrapbook* when pattern contains charms only.
- Symmetry options in gradient colour definition dialog.
- Better conversion of 32-bit pictures in dialog *My charm*.
- Replacing a charm picture now takes in account transparency if 32-bit.

Correction:

- Crash when clicking on text quality icons in *My text* dialog.
- Bug showing a ghost backstitch in creation mode after a single click.
- Bug not erasing backstitch preview after click, move then right click.
- Bug with colours when creating a transparent text charm.
- Bug with colours in *Colours 1* and *Nightfall* effects.
- Auto backstitch mode did not ignore hidden colours.

- Undoing backstitch deletion without menu did not restore Z-order.
- Beads sparkling per colour did not work.
- Bevel option was not always available from charm context menu.
- Changes in *Readme.txt* (when opening a pattern with 7-Zip):
 - Knitting or latch hook with charms only ⇒ *CONTENT=Scrapbook*.
- Menu options *View/Charms|Objects* were disabled for knitting and latch hook.

Version 1.57 - april 18, 2016

Addition:

- More metric and US/UK linear fabric sizes in context menu.
- Fabric colours from *PCStitch*, *Pattern Maker* and *StitchCraft*.
- Charm effects *Colours 2*, *Drawn 3*, *Texture*, *Trapeze 2*, *Mosaic 2* And *Box*.
- 18 more charm transparency masks.
- Menu *Tools/More/32-bit picture tools*.
- More selection/object axes styles using *Ctrl+A*.
- Ability to choose between insert and hang when pasting copied quilting points.

Improvement:

- Ability to select objects from within the *Objects Properties* dialog.
- Advanced 32-bit pictures stretching.
- More options in charm effect *Drawn*.
- Print job name now based on current pattern title.

Correction:

- Crash converting a *PCStitch* library when no pattern open.
- Possible crash while printing a shadowed tiny charm.
- Possibly erroneous transparency in charm effect *Reflection*.
- Possibly erroneous 32-bit validity check in charm library creation.
- The palette colours adjustment ignored objects.
- Did not check for room when rotating selection/object from menu.
- Did not allow inserting a motif or a charm bigger than the pattern:
 - When selecting it again in the library.
 - After you refused to increase pattern size.
- Bug hiding selection/object axes with *Ctrl+A* but not disabling axes display.
- No more unexpected double flip/rotate from selection/object colour dots.
- No more leaves selection when zooming from icon or plus and minus keys.
- Did not show all effects in quilting text effect dialog.

Plus changes made in version 1.56, see below:

Version 1.56 (unreleased) - december 12, 2015

Addition:

- Menu *Edit/Selected charm/Colours/Blend*.
- Menu *Edit/Selected charm/Outline/Colour in*.
- Menu *Edit/Selected charm/Transparency/Mask*.
- Menu *Edit/Selected charm/Picture/Effect*.
- Menu *Edit/Selected charm/Picture/Bevel*.
- Menu *Edit/Selected charm/Picture/Copy to clipboard: source picture + effect*.
- Menu *Edit/Selected charm/Picture texture/Rather filter brightness*.
- Menu *Edit/Palette/Adjust palette*.
- Menu *View/Zoom/Whole width*.
- Menu *View/Zoom/Whole height*.
- Menu *View/Rendering*.
- Menu *Tools/Backstitches/Curved backstitches (auto left)*.
- Menu *Tools/Backstitches/Curved backstitches (auto right)*.
- Menu *Tools/Buttons and charms/My transparent picture*.
- Menu *Tools/Charms library creation tool*.
- Ability to use your own outline masks.
- Thin outline option when defining a mask.
- Alternate method when replacing a charm picture.
- Stitched fonts *02x03-A (Curved BS)*, *28x36-A (XMas 2013)*.
- Charm outline masks 78, 624 to 626.
- Fabric colour palette *Wichelt Tula 10ct*.

- Generic colour palettes *256 Generic Golds/Greys/Sepias*.
- Reference colour palette *RAL Classic*.

Improvement:

- Automatically zooms out when inserting a motif/charm greater than display.
- Charm toolbar/change zoom:
 - Holding button down now repeats.
 - More zoom values.
- Months and week days in Dutch version.
- Ability to predefine an URL value in charm definition (statement *DU*).
- Ability to specify the end in charm definition (statement *EOD*).

Correction:

- Crash opening *Edit* menu after deselecting an object.
- Crash dropping a text file when no pattern loaded.
- Crash trying to define an outline mask for a calendar object.
- Crash printing after view as 3D object.
- Crash viewing as 3D object after pattern size change.
- Crash generating objects shadow for printing.
- Crash loading a huge picture in dialog *My charm*.
- Toggling backstitch curve lost 1st point and ended chain mode.
- Outlining with backstitches did not take in account:
 - Curved backstitches areas.
 - Actual beads areas.
 - Charms areas.
- Computing bead sizes did not take in account non square grids.
- Rendering with 3D backstitch styles 2 and 3 ignored curves.
- Pattern mat:
 - Was not drawn over all objects.
 - Printed as silhouette only.
- Symmetry axis was not drawn over all objects.
- Copying a zoomed charm picture mask ignored the zoom factor.
- Undoing object deletion did not restore Z-order.
- Did not actually merge identical colours in objects.

Plus changes made in version 1.55.01, see below:

Version 1.55.01 (unreleased) - march 5, 2015

Addition:

- Ability to preview all stitched fonts to choose one.
- Ability to view as sphere using *myriaCross Spherizer*.
- Motifs library *Textures*.
- Charms library *Symbols 4*.
- 26 more charms in scrapbook bonus charm library *People*.
- Libraries *Ellipses* and *Laces* in scrapbook bonus charms collection.
- 16 more canvas textures.
- Website in *Birthstone* palettes.
- Stitched fonts *07x11-A*, *11x15-A* (*Complete*).

Improvement:

- Beads light is now top left (for consistency with objects shadow).
- Ability to display beads with a shadow.
- Now recognizes beads size on pattern sizing and area selection.
- Now previews bead area in creation mode.
- 2 sparkle sizes depending on zoom factor.
- Now suggests a motif name based on current date and time.
- Ability to save areas as motifs to specified library filename.
- Ability to rename and import/export such libraries as .mcpli library installers.
- Stitched font preview now shows more defined characters.
- Ability to export floss usage as either .htm or .html document.
- Accented characters now translated to named characters in HTML documents.
- Ability to simply copy 3D view converted charm rather than inserting it.
- Ability to delete user charm libraries.
- Ability to specify a tooltip value in charm definition (statements *DH* and *HT*).

- Added shadows in some charm libraries.
- Better look for *Hearts* charms.

Correction:

- Possible bug due to invalid characters in localised motif names.
- Renaming a library motif:
 - Did not update the insertable object name.
 - Lost the motifs size in tooltip.
 - Was case sensitive, this could loose motifs.
- Deleting a motif library did not show message window on other library load.
- Did not check for available room in pattern:
 - When rotating a selection or an object.
 - When pasting as selection or as object.
- Changing pattern resolution did not update standard sub objects accordingly.

Version 1.55 - february 1, 2015

Addition:

- Menu option *Edit/Select more/Global change/Create backstitch outline*.
- Menu option *Edit/Selected charm/Set calendar*.
- Menu option *View/Backstitches/With 3D effect (style 3)*.
- Menu option *View/Save display profile*.
- Menu option *View/Load display profile*.
- Menu option *Tools/Buttons and charms/My calendar*.
- Menu option *Tools/Options/Behaviour/Embed a preview in pattern file*.
- More information files *Edit Time* and *Stitch types*.
- More information property *EdTime* (editing time).
- Charm outline masks 618 to 623, 876.
- Stitched fonts *02x06-A*, *08x11-A*, *08x11-B*, *09x07-A* and *13x12-A*.

Improvement:

- Ability to export floss usage as HTML document.
- Ability to import Floriani, Wilcom and WinStitch thread ranges on colours edition.
- Ability to print to A2 and A1 paper sheets.
- Ability to rename cross stitch objects.
- Palette ordering method now saved in pattern file.
- Attached .txt files now open internally/externally depending on setting.
- Content of My Documents\myriaCross editor now checked once a day for speed.
(sub folders Custom, MoreInfo and Profiles)

Correction:

- More information properties *PropCT* (petite flags), *PropPal* (fabric entry).
- Typo in description for DMC 3753 and 3779.
- Bug when inserting a pattern info placeholder on charm text change.
- Bug when ordering the palette when the list is scrolled.
- Bug hiding the blinking cursor in whole view.
- Possible bug loading files with CR as end of line.
- Possible bug printing an empty page after palette.
- Crash changing buttons and drawn charms transparency.

Plus changes made in version 1.54.01, see below:

Version 1.54.01 (unreleased) - june 14, 2014

Addition:

- Ability to create new patterns with a 3D template.
- Ability to backup and restore custom data.
- Ability to specify time to keep recover files before deletion.
- Ability to select a recent folder in the file browser dialog.
- Ability to delete backstitches on right click.
- Stitched fonts *05x05-WDC* and *06x07-A*.
- Bonus charms libraries *Open Clip Art*.

Improvement:

- Choose quilting point dialog now covers whole icons.
- Installer now copies itself to *My documents\myriaCross editor\Installers*.
- Now shows total fractional stitches in the palette usage dialog.

- Recover file no more deleted when not saving a modified pattern.
- Recover files now visible in the file browser dialog.
- Completed thread range *Superior Threads Polyester (King Tut)*.

Correction:

- Bad sub objects memory management when leaving a pattern.
- Crash when converting patterns in the batch conversion tool.
- Possible crash on exit (trying to redraw colour palette).
- Possible crash using Tab key in new pattern dialog.
- Possible crash generating preview pictures in the file browser dialog.
- Animated pictures were named with 2 dots in the picture creation tool.
- Previewing recent library motifs cleared the pattern extended data.
- Selection toolbar cursor was blinking.
- User filter spot colour was not saved in the picture adjustment dialog.

Version 1.54 - april 29, 2014

Ability to open the file browser at startup.

Ability to display 3/4 stitches as triangles in coloured blocks mode.

Ability to move selected area 1/2 stitch.

Ability to hide colours in cross stitch, knitting and latch hook patterns.

Shortcut key Ctrl-Y toggles symbols display ON/OFF.

Added charm textures 63 to 66.

Corrections on pattern loading:

- Sets a handle to objects having none (drawn charms did not set any).
- Clears extended data of deleted objects.

Converting a pattern did not spread the symbols display mode.

A lot of Improvements and corrections; see below:

Version 1.53.01 (unreleased) - march 2, 2014

Addition:

- Main toolbar icon to open a sample pattern.
- Menu *View/texture*.
- Ability to attach pattern files to pattern.
- Ability to define and use custom thread and bead ranges.
- Ability to disallow palette standardizing in objects properties.
- Ability to disallow charm outline smoothing in objects properties.
- Charms library *Photos (templates)*.
- Knitting motifs library *Motifs 1*.
- Thread range *Superior Threads Polyester (King Tut)*.

Improvement:

- Size of quarter stitch position blinking dot depends on grid size.
- More details in the floss usage dialog (full, 3/4, 1/2, 1/4 and petite).
- Ability to export comma delimited numbers to semicolon delimited csv.
- Sepia rendering now preserves darkest colours.
- Completed library motifs English and German names.
- Localised knitting and latch hook library motifs names.
- Now uses FreeImage version 3.15.4 (previously used version 3.13).
- File browser now cleans up temp folder after previews generation.

Correction:

- Increasing pattern size for item insertion could not be undone.
- Did not recognize +IN2R and +SP2R statements when loading charm libraries.
- Charms with coloured outline masks could contain erroneous pixels.
- Disallowed pattern resizing was ignored when inserting a too big motif.
- Selecting a palette colour could update available colours menu erroneously.
- Palette scrolling arrows could stay visible when closing pattern.
- Math functions with a negative argument were evaluated erroneously.

Version 1.53 - february 9, 2014

Added main toolbar.

Ability to specify regions for 3D views.

Ability to make objects from 3D views.

Ability to view objects with more options.
Ability to increase size of textured crosses.
Ability to rename/replace picture in new charms.
Ability to apply advanced locks to objects.
Ability to use charms in knitting and latch hook patterns.
Bugs were corrected.

Version 1.52.01 (unreleased) - january 19, 2014

Addition:

- Main toolbar icons.
- Menu option *Edit/Selected charm/Outline/Define a mask*.
- Menu option *Edit/Selected charm/Transparency/Brightness*.
- Menu option *Edit/Objects properties*.
- Menu option *View/Crosses/Oversize*.
- Menu option *View/Objects/Bounding box when inserting*.
- Menu option *View/Objects/Bounding box when selected*.
- Menu option *View/Objects/Double buffering*.
- Fast access palette in the available colours panel.
- Shortcut key F8 opens clipboard content.
- Binary file format for pattern information files.
- Preset pattern information file *Alternate sizes*.
- Internal handling to disallow moving/outlining some charms.
- Charm outline masks 089, 095, 099, 150, 151, 451 to 462, 617, 868 to 871.
- Frame *Wood frame 10*.
- 5 cross stitch textures.

Improvement:

- Clicking modified colours icon in available colours panel launches the colour edit dialog.
- Ability to load Embird & SewWhat-Pro thread ranges in the colour edit dialog.
- Ability to rename/replace picture in new charms created with My charm/My empty charm.
- Ability to specify picture Resolution in My empty charm dialog.
- Moving a charm half a grid square now waits for Ctrl key up afterward.
- Faster tooltip for some controls in main window.
- Completed Portuguese language file.
- 30 more generic cloth colours and better look for palette colours in New dialog.
- Current palette specified in capture menu.
- Better look for clock and increased size.

Correction:

- Backstitches with 3D style 2 were too thin.
- Editing range colours did not update blended range accordingly.
- Full screen view did not display underlay picture.
- Crash when searching colour in object at mouse pointer position.
- Crash/too much memory used due to erroneous pictures memory management.
- Bug redrawing maximized window when resizing main window below min size.
- Bug automatically moving item selection dialog: title could be off screen.
- Bug not displaying some items when pattern contains beads.
- Bug displaying textured knitting/latch hook when cross stitch uses a varying texture.
- Bug displaying zoomed charm pictures.
- Bug evaluating logical expressions True and False.
- Bug auto selecting default mode when removing unused colours when all unused.
- No more prints leading and trailing empty lines in notes.

Version 1.52 - december 18, 2013

Ability to measure pattern and make snapshots.
Ability to create your own pattern information.
Ability to make rectangular tile charms.
Ability to display stitches with a randomly varying texture.
Enhanced quality of the copyright watermark.
Completed some Rainbow Gallery palette.
Bugs were corrected.

Version 1.51.01 (unreleased) - december 9, 2013

Addition:

- Menu *Edit/Select more/Measure*.
- Menu *Edit/More pattern information*.
- Ability to make rectangular tile charms.
- Internal handling for Section/Variable/Value data.
- Internal handling for unique ID for objects.
- Internal handling for screen buttons.
- 2 more specialty stitches *Hardanger Diammond*.
- 5 more textures for crosses.

Improvement:

- Picture creation tool disables tooltip, highlight & blinking outline.
- Object tooltips now display linear size too.
- Blinking creation dot is now retained location.
- Nicer grid textures #49 and #50.
- Completed palette *Rainbow Gallery (Fuzzy Stuff)*.
- Completed palette *Rainbow Gallery (FyreWerks)*.
- Completed palette *Rainbow Gallery (Neon Rays+)*.
- Completed palette *Rainbow Gallery (Petite Silk Lame Braid #18)*.
- Completed palette *Rainbow Gallery (Petite Treasure Braid)*.
- Completed palette *Rainbow Gallery (Silk Lame Braid #13)*.
- Completed palette *Rainbow Gallery (Silk Lame Braid #18)*.

Correction:

- Crash undoing set symbol for colours having none.
- Bug displaying beads in black symbols display mode.
- Program counters and purchase data now per user.
- No displayed version for PCStitch patterns v4~6.
- Bug clearing root folder on exit for some USB devices.

Version 1.51 - november 11, 2013

Addition:

- Now loads Stitch R-XP .rxt templates.
- Fabrics *Charles Craft Aida Fabric*.
- Fabrics *Charles Craft Irish Linen Fabric*.
- Fabrics *Charles Craft Royal Classic Fabric*.
- Fabrics *Charles Craft Soft Touch Fabric*.
- Fabrics *Charles Craft Super Linen Fabric*.
- Fabrics *Vaupel & Heilenbeck Linen Fabric*.
- Palette *Cifonda Silk*.
- Palette *Cosmo*.
- Palette *Cosmo Pearl Cotton*.
- Palette *Domino Pearl Cotton*.
- Palette *Eva Rosenstand*.
- Palette *Majestic Merino Wool*.
- Palette *Minnamurra*.
- Palette *Royal Stitch Wool*.
- Palette *Spindrift Wool*.
- Palette *Vintage Silks*.

Improvement:

- Better loading of Stitch R-XP .pt7 patterns.

Correction:

- Fixed dll installation on 64-bit machines.
- Fixed a crash resizing text windows.

Version 1.50 - october 20, 2013

Ability to choose charm outline smoothing method.

Ability to keep outline shape/mask aspect ratio.

Ability to create colour key objects.

Ability to rotate stitched texts using system fonts.

Enhanced undo management.

Enhanced loading of 32-bit RGBA pictures.
Enhanced spot light in charm picture adjustment.
Enhanced joining of backstitches.
A lot of bugs were corrected.

Version 1.49.01 (unreleased) - september 27, 2013

Addition:

- Menu *Edit/Undo more*.
- Menu *Edit/Selected charm/Outline/Smoothing*.
- Menu *Edit/Palette/Create a colour key*.
- Menu *View/Objects/Colour keys*.
- New command HQS (smoothing) in charm definition files.
- 14 more bonus textures as scrapbook papers.
- 6 more textures as cross stitch grids.
- 3 more textures as outline masks.

Improvement:

- Now loads RGBA pictures, handles transparency and auto crops.
(Open/Underlay/Logo pictures on white, Charm pictures on magenta)
- Default palettes now use nearest holding threads for beads.
- Right clicking on pattern information icon launches website.
- Paper texture previews are now fully visible (stretched).
- Better clock visibility using anti-aliased lines.
- Better smoothing for charms contour.
- Placeholders *@EML*, *@LWB* now available for eMail in texts.
- Nicer grid textures #17 (cubes) and #48 (fabric holes).
- Disables smoothing to speed up loading of charm libraries.
- Colour preview for beads when hovering over their whole area.
- Picture adjustment: more sizes, positions and colours for spot light.
- Palette entries show a small plus when blended.
- Stitched texts using system fonts can now be rotated.

Correction:

- Fixed a crash selecting an outline mask in English version.
- Logo picture now considered at 300 dpi (was 150 dpi).
- Selecting a colour may require updating floating toolbar.
- Hovering over selected area did not preview colours.
- Did not unselect before converting to range or tint.
- 5 textures for crosses caused erroneous charms creation.
- Rotating any angle in *My charm* lost picture pixels.
- Making puzzle in *My charm* could create empty pieces.
- Charm pictures cannot be copied if pattern is read-only.
- Hidden charms were visible in detail windows.
- No more horizontal line appearing sometime below beads.
- Undoing backstitch/knot/bead deletion lost stacking order.
- Deleting hidden backstitches worked regardless of colour differences.
- Deleting hidden/joining/dividing backstitches reported erroneous count.

Version 1.49 - september 5, 2013

Solved installation problems on 64-bit computers.
Ability to load/install PCStitch motif libraries.
Ability to copy charm pictures to the clipboard.
Ability to display stitches with a varying texture.
Ability to display beads using actual shape and size.
Enhanced *Attach files* dialog.
Enhanced stitched fonts preview.
Enhanced files encryption method.
Enhanced created PDF documents: page locator.
Enhanced saving: bmp charm pictures compressed to png.
A lot of bugs were corrected.

Version 1.48.01 (unreleased) - august 5, 2013

Addition:

- Loading/installation of PCStitch .plb libraries.
- Shortcut key Del erases selection/object.
- Menu *Edit/Selected charm/Picture/Copy to clipboard*.
- Stitched font 2x2.
- 15 more textures for crosses.
5 varying textures (depends on strands count).
- 4 more outline masks.
- Palettes *Madeira Cotton*: Cotona & Lana.
- Palettes *Mill Hill Beads*: Buggle Small/Medium/Large, Crayon, Frosted, Glass, Magnifica, Pebble, Petite, Pony 6/8.
- Palettes *SJ Designs*: 8/0 Glass Seed, Square 1.5 & 3 mm.

Improvement:

- Completed German language file.
- Better aspect for grid texture #37.
- Better font preview in text panel.
- Inserted stitched texts show font name in tooltip.
- Attach dialog: shows file icons and file size as tooltip.
- Attach dialog: auto selects added file; no duplicates.
- Attach dialog: warns when no default program.
- File browser now shows hidden folders.
- Only read-only patterns are now saved encrypted.
- Pattern page locator in created PDF documents.
- Charms shadow and transparency now editable when supported.

Correction:

- Crash right-clicking on a locked charm.
- Crash in full screen view when a panel is open.
- Lost bycolour linetype when changing backstitch colour to current.
- Updated link to Olde Worlde Embroidery site.
- Changed pan direction for zoomed charm picture.
- Adjusted objects toolbar right and bottom max position.
- Hovering over a bead displayed holding thread colour.

Version 1.48 - july 1, 2013

Ability to create construction circles/ellipses.

Ability to create drawn charms.

Ability to create tiled charms.

Enhanced new dialog.

Enhanced file browser.

Enhanced mats dimensioning.

Enhanced buttons creation.

Enhanced charm texts creation.

Completed Mill Hill Treasures charms library.

More embroidery conversion shapes.

More thread ranges.

Version 1.47.01 (unreleased) - june 21, 2013

Addition:

- Menu *Tools/Buttons and charms/My circle/ellipse*.
- Menu *Tools/Buttons and charms/My drawn charm*.
- Option *File browser* in startup dialog.
- 6 more *Red Heart* knitting/crochet thread ranges.

Improvement:

- More margin sizes for mats (0.5 to 2%).
- My button can now be shadowed and transparent.
- Increased drawing speed for some features.
- Now clearly shows content types in new dialog.
- More features for drawn charms definition:
 - Apply shadow (SHD), not editable.
 - Apply transparency (TRN), not editable.

- Now asks before creating PDF chart with more than 10 pages.
- Previews in file browser now show underlay picture.
- File browser supports more formats (.chart, .jgg, .pat, .phd, .pt5, .pt6, .pt7, .scc, .spf, .xsd)
- Mill Hill Treasures library now contains 357 charms.

Correction:

- No more embeds symbol fonts *Arial Black*, *Times New Roman*.
- Cloning or pasting charms lost provider, type and reference.
- Could show symbols by colour in legend for created coloured PDF.
- Crash building huge charm preview when printing/creating PDF.
- Crash smoothing very small charms (less than 3 pixels).

Version 1.47 - may 28, 2013

Ability to edit available colours RGB values.

Ability to attach some files to pattern files.

Ability to print the list of used buttons and charms.

Created PDF documents contain the list of buttons and charms.

Check for update also checks for bonus and lessons.

More startup behaviours.

Version 1.46.02 (unreleased) - may 28, 2013

Addition:

- Created PDF document contains the list of buttons and charms.
- Menu option Select/Select more/Lock all charms.
- Menu option Select/Select more/Unlock all charms.
- Menu option Tools/Options/Startup/Behaviour/Open latest pattern.
- Menu option Tools/Options/Startup/Behaviour/Open all recent files.
- 9 more bonus scrapbook charms.

Improvement:

- Charms created with the program contain a description.
- Completed Dutch language file.
- Shows FreeImage version in the about window.

Correction:

- File recover dialog title changed to *Open*.
- Crash due to autosave for recover: changed current pattern data.

Version 1.46.01 - may 23, 2013

Addition:

- Ability to edit available colours RGB values:
 - Editing RGB values manually.
 - Loading PCStitch/Pattern Maker/Cross Stitch Pro floss files.
- Ability to specify items provider, type and reference in charm libraries.
- Ability to attach some files to pattern files.
- Ability to print the list of used buttons and charms.

Improvement:

- Check for update also checks for bonus and lessons.
- Bonus and lessons dialogs now show required updates.

Deletion:

- Charms library Wichelt - replaced with Mill Hill Treasures.

Correction:

- Bug ordering palette: wrong colour with colour picker and right-click.
- Bug deleting stock records: could corrupt the stock.
- Bug deleting all stock records: crash editing stock again.
- Bug converting RGB to HSL: unpredictable effect.
- Bug updating the program when fading in/out is enabled.

Version 1.46 - may 1, 2013

Completed German language file.

More startup behaviours: open, new, create new.

Added this history of changes in help menu.

Added every picture file type in file open dialogs.
More file formats: load and edit .txt files.
Enhanced PDF document creation: multiple pages, BW or coloured.
Enhanced charms: progressive transparency, hide all, lock, more canvas.
Enhanced detection of islands: added to menu, single or all colours.
A lot of bugs were corrected.

Version 1.45.01 (unreleased) - april 29, 2013

Addition:

- More startup behaviours :
 - Show Open or New dialogs.
 - Create a new pattern.
- Every picture file type in :
 - File open dialog.
 - Underlay picture load dialog.
 - Logo picture load dialog.
- Loading and edition of text (txt) files :
Either internally or with external editor.
(Menu Options/Behaviour/Open text files with external editor)
- PDF document pattern chart with black symbols or coloured blocks.
- PDF document with thread ranges legend + strands + blended colours.
- Duplex option + warning about margins in print dialog.
- Charms progressive transparency using a mask.
- Charms locking (move and edit).
- Ability to hide charms for fast redraw when creating crosses.
- 9 more canvas textures for charms.
- Menu Help/History (of changes).

Improvement:

- Completed German language file (thanks to Sabine).
- New start default print margins: 1 inch.
- New pattern initial zoom depends on content type.
(CS:150%, Knt:66%, Lhk:30%, Qlt:50%, Emb:150%, Pic:100%)
- More than one page for pattern chart in PDF document when required.
- Detection of islands of crosses: single colour or all colours.
- Completed palette *Kreinik*.

Correction:

- Bug saving configuration file (introduced in version 1.43).
- Bug batch converting PCStitch patterns to knitting .mcpat files.
- Now remembers default pattern information email address.
- Possible infinite loop trying to load some .txt files as PC Quilter.
- Possible crash setting per colour beads sparkling.
- Possible crash creating again a PDF document that is already open.
- Possible extraneous empty page when creating PDF document.
- Black pixels of charm picture were not processed by canvas mask.
- Printed canvas texture did not link up correctly between shared picture.
- Did not show unequal grid count in printouts and created PDF documents.

Version 1.45 - april 8, 2013

More pattern information: email address, total in floss usage.
More recognized formats: Stitch (Henrik Bergström).
More features in picture conversion: colour balance.
More features in quilting editor: [continuous] hang.
More resources: charm textures, embroidery shapes and motifs.
A lot of bugs were corrected.

Version 1.44.01 (unreleased) - march 28, 2013

Addition:

- Just installed message shows key installer filename.
- Colour balance setting in picture conversion panel.
- Quilting editor:

- Ability to hang and continuously insert or hang points.
- 4 more effects: sine distortion.
- Angles wheel now shows 5° divisions.
- Rotating all points now shows angles in tooltip.
- 18 more charm textures.
- 6 more embroidery shapes.
- Motifs library *Blackwork 3*.
- Now loads Stitch (Henrik Bergström) patterns.
- Email address in pattern information.

Correction:

- Buy and stitch panel text input: same font and size as displayed text.
- Rotating any angle in My charm dialog no more adds weird pixels around.
- Display bug changing mouse cursor shape when hovering over objects.
- Display bug unselecting an object when another one is highlighted.
- Display bug showing white horizontal lines for some stitch combinations.
- Bug on save making motifs unreadable (introduced in version 1.43).
- Curved backstitches were sometime unselectable.
- Quilting editor:
 - Now previews moving zigzag items.
 - Now restores pattern size on undo.
 - Possible crash undoing uncomplete point insertion.
- Creation of animated GIF picture with embroidery motifs:
 - Now includes a frame with empty background.
 - Generated file could be wrongly read by some GIF readers.

Version 1.44 - march 7, 2013

Quilting editor:

- Ability to snap to markers in rulers.
- Ability to create markers at points.
- Ability to reflect [and close].
- Ability to change start point.
- Ability to rotate and copy.
- Ability to change sewing direction.
- Ability to rotate all points.
- Ability to apply an effect.
- Ability to insert or hang texts.
- Ability to cut, copy, paste and delete a range of points.

Version 1.43.01 (unreleased) - march 4, 2013

Addition:

- Quilting editor:
 - Snap to markers in rulers.
 - Create markers at point.
 - Reflect and close.
 - Change start point.
 - Rotate and copy.
 - Change sewing direction.
 - Rotate all points.
 - Apply an effect.
 - Insert or hang a text.
 - Cut, copy, paste, delete points.

Improvement:

- Quilting editor:
 - Now supports whole pattern view.
 - Nicer colour for thin grid lines.
 - Now adjusts motif size when required.
 - Now allows adding more fabric around.
 - Increased speed loading controls' mouse cursor.
 - Now allows up to 64 markers per pattern.

Correction:

- Quilting editor: changing mode now keeps show/snap states.
- Crash displaying grid lines with high zoom ratio.

Version 1.43 - february 20, 2013

Ability to create detail windows.

Ability to create freehand charms.

Enhanced creation of colour legends.

Enhanced creation of rectangles on the grid.

Enhanced creation of charm from selection/object.

Enhanced conversion to embroidery.

Ability to save quilting motifs to PC Quilter (txt), CompuQuilter (cmd, cqp), HQ Pro-Stitcher (hqf), ABM AutoPilot (pat) and Side Saddle (ssd).

Ability to create, repeat, resize and edit quilting motifs.

Ability to convert embroidery to quilting and quilting to embroidery.

Version 1.42.01 (unreleased) - february 12, 2013

Addition:

- Dialog *New* ⇒ new quilting.
- Menu *Edit/Select more/Create or delete detail windows*.
- Menu *Edit/Edit pattern*.
- Menu *Tools/Buttons and charms/My freehand charm*.
- Edit menu options *Repeat, Resize, Edit stitches* for quilting motifs.

Improvement:

- Bonus charms now have a shadow set.
- Colour legends creation now allows selecting text content.
- Rectangular shapes on grid can now display their size.
- Converting selection/object to charm now sets accurate origin.
- Saving thread range to palette now asks for filename.
- Conversion to embroidery:
 - Cross sizes now show count vs size.
 - Added some cross sizes to cover the 3~40 count range.
 - Automatically selects nearest cross size.
 - Backstitches now use a odd count of strands.
 - Option to retrieve strands information from palette.
- Quilting features:
 - Supports saving to txt/cmd/cqp/hqf/pat/ssd.
 - Allows repeating and resizing motifs and editing stitches.
 - Horizontal mirror reverts the list of stitches.
- Now supports PNG pictures as frame definition.
- Completed palette *Atalie Cotton*.
- Completed palette *Rainbow Gallery (Neon Rays)*.
- Completed palette *Rainbow Gallery (Neon Rays+)*.
- Completed palette *Rainbow Gallery (Petite Silk Lame Braid #18)*.
- Completed palette *Rainbow Gallery (Silk Lame Braid #13)*.
- Completed palette *Rainbow Gallery (Silk Lame Braid #18)*.
- Completed palette *Rainbow Gallery (Wisper)*.
- Added palette *Wilcom Colours*.

Correction:

- Fixed width and shadow position of printed mat silhouette.
- Fixed conversion of big selections/objects to charms.
- Fixed redraw of shadows after backstitch, knot or bead creation.
- Fixed background colour when copying transparent frame to clipboard.
- Fixed file type filters when saving quilting motifs.
- Fixed speed generating grid lines when no hiding regions.
- Fixed a crash when de-highlighting objects.
- Fixed a crash when rotating 32-bit .jpg underlay picture.

Version 1.42 - january 10, 2013

Ability to hide regions of the grid.

Ability to create shapes on the grid.

Ability to smoothen charms contour.
Ability to create markers in rulers.
Ability to create half scale charms from selected area/object.
Ability to define outline shape in *My empty charm*.
Ability to define height variation in *My text*.
Ability to clone objects and charms.
Ability to save thread ranges as palettes.
More canvas textures.
More scrapbook bonus charms: *Rosaces*.
More masks for charms contour (jigsaw).
More lessons: *Working with the grid*.
More variables for text charms content.
A lot of corrections and Improvements.

Version 1.41.01 (unreleased) - january 5, 2013

Addition:

- Menu *Edit/Select more/Hide or restore regions of the grid*.
- Menu *Edit/Select more/Create shapes on the grid*.
- Menu *View/Charms/Smoothen*.
- Ability to create up to 32 markers on rulers (saved in pattern).
- Ability to create half scale charms from selected area/object.
- 19 more canvas textures for picture charms.
- 32 more scrapbook bonus charms: *Rosaces*.
- 3 more masks for charms contour (jigsaw).
- More variables for text charms content (size, density, localized words).

Improvement:

- My charm: now always shows fabric/paper area in relative sizes preview.
- My text: nows shows text height (stitches + inches or mm) with font size.
- Loading AutoCAD (dxf): now uses inches unless otherwise specified.
- Modify texts: now allows changing to uppercase, lowercase and titlecase.

Correction:

- My charm: could not always use up to 1200 pixels for charm picture.
- Settings: could not select all cross stitch textures.
- Loading: did not remember filter for AutoCAD (dxf).
- Printing: erroneous *adjust to page* ratio when choosing another scale.
- Printing: grid no more covers cutouts.
- Ctrl+A shortcut now refreshes axes for selected area/object.
- Bug saving as font/motif/stitch (introduced in version 1.41).
- Crash selecting erroneous font/motif/stitch.
- Crash opening specialty stitches panel when pattern has an underlay picture.

Version 1.41 - december 11, 2012

Ability to select a background texture as scrapbook paper.
Ability to make charms with cross stitch selections and objects.
Ability to flip charms outline and picture.
Ability to flip charm picture before insertion (context menu).
Ability to create empty charms to make coloured shapes.
Ability to display (white/silhouette) charms with a black border.
Ability to specify printing scale.
Now displays and prints picture charms at all zoom factors with no crash.
Now prints accurate page numbers when printing selected page, row or column.
Charms highlighting now ignores areas hidden by other objects.
Creating my text now allows specifying an angle.
Creating cross stitch shapes now requires standard click/move/release method.
Underlay picture now appears in printout cover page, 3D views and created pictures.

Version 1.40.01 (unreleased) - november 27, 2012

Addition:

- Menu *Edit/Selected area/Make charm*.
- Menu *Edit/Selected charm/Outline/Flip horizontal and vertical*.

- Menu *Edit/Selected charm/Picture/Flip horizontal and vertical*.
- Menu *Edit/Selected object/Make charm*.
- Menu *View/Charms/White inside*.
- Menu *Tools/Buttons and charms/My empty charm*.
- Context menu for picture charms insertion.
- Texture selection as underlay picture.

Improvement:

- Quick selection or object move is now 5 grid squares.
- Underlay picture now appears when creating a static picture (whole).
- Underlay picture now appears when viewing as 3D object.
- Underlay picture now appears when printing cover page.
- Creating my charm and my text now sets a shadow.
- My text can now be created with an angle (-90°, 90° or 180°).
- Highlighting charms ignores areas hidden by other objects.
- Object toolbar moves to be fully visible.
- Viewing as perspective: better colours rendering.
- Enabling charms outline display now borderizes picture charms too.

Correction:

- Could highlight erroneous area when hovering over picture charms.
- No more flickering on symmetry axes selection while beads flash.
- Deleting unique bead colour, thus adding DMC 310 kept erroneous tool.
- My text 3D effect could generate weird areas.
- No more ugly black pixels when applying canvas texture.
- Could not locate and highlight flood filled charms.
- Changing underlay picture did not apply current sizing method.
- No more ignores colour of editable text in charms.
- Rotating/mirroring underlay picture did it on source picture.
- Undoing underlay picture change did not retrieve picture file.
- Crash converting an empty pattern to embroidery.

Version 1.40 - november 12, 2012

Ability to quickly move selections and objects using Ctrl+Shift.

Ability to speed up charms display by loading them in memory.

Ability to automatically detect and select islands of stitches.

Ability to select only items that use current colour.

Ability to resize content of selected area.

Ability to convert only quarter stitches to petite stitches.

Ability to automatically save in order to recover after a crash.

Ability to zoom and pan charm picture inside its bounding box.

Ability to adjust charm picture brightness, contrast, gamma, saturation, ...

Ability to apply a 4 colours gradient to the charm picture.

Ability to apply a texture to the charm picture and set the blending level.

Ability to apply a shadow to the charm picture outline.

Ability to create text charms using system fonts (flat, gradient or 3D).

Ability to lock objects stacking order and change it on demand.

Ability to download bonus files.

Enhanced picture charm creation: select whole picture or an area.

Enhanced printouts: grid size is the same for all printed pages.

Enhanced interface: demo version shows a *no save* warning message.

Version 1.39.02 (unreleased) - october 29, 2012

Addition:

- Menu *File/Recover*.
- Menu *Edit/Select more/Current colour*.
- Menu *Edit/Selected charm/Colours/4 colours*.
- Menu *Edit/Selected charm/Picture zoom*.
- Menu *Edit/Selected charm/Picture adjustment*.
- Menu *Edit/Selected charm/Picture shadow*.
- Menu *Edit/Selected charm/Picture texture*.
- Menu *Edit/Paste as selection*.

- Menu *Edit/Paste as object*.
- Menu *Options/Behaviour/Load charm pictures in memory for speed*.
- Menu *Help/myriaCross editor bonus*.
- Palette *Paterna Wool*.
- More mat shapes and textures.
- More cross stitch shapes.
- More charm contour polygons and masks.

Improvement:

- Mat silhouette is now shadowed.
- Charm masks now display a localised tooltip text.
- My charm now allows cropping huge photos with no loss of resolution.
- Loading now forces using notes for cover page if no cover text.
- Recover files now saved to *My documents\myriaCross editor\Recover*.
- Evaluation version now displays a startup message (no save).
- Minimum interface now shows *no click* mouse pointer shape.
- Now displays installation date and time in about window.
- Moving over zoom icon with Ctrl key pressed displays size in pixels.
- Fast move selections or objects using Ctrl+Shift.

Correction:

- One pixel right/below offsets from background for transparent charms.
- Island detection now requires Shift key (Ctrl key already used).
- Rotating my charm any angle now checks for picture size.
- Crash creating a new pattern from copy of a charm object.
- Crash drawing a big charm with high zoom in.
- Crash converting more than 32767 crosses to beads.
- Potential crashes: did not cleanup temp folder on launch.

Version 1.39.01 (unreleased) - october 2, 2012

Addition:

- Automatic detection of islands of stitches in selection mode.
- Menu *Edit/Select more/Global change/Convert quarter stitches to petite stitches*.
- Menu *Edit/Selected area/Edit selection/Convert quarter stitches to petite stitches*.
- Menu *Edit/Selected area/Edit selection/Resize*.
- Menu *Options/Behaviour/Automatically save to recover after a crash*.
- 25 more masks for charm contour.
- 5 more cross stitch textures.

Improvement:

- Now stores cover page styles in pattern (text placement, pages numbering, use notes).
- Now prints sites URL in notes or cover text in blue.
- Far less flickering when moving selections and objects.

Correction:

- Autobackstitch might miss some extreme quarter stitches.
- Loading/saving of French knots and beads (Cross Stitch Pro).
- Could no more change object colour from toolbar.
- Now displays a simpler logo at startup.
- Now stores elapsed usage time counter every minute.
- Now ensures grid size is the same for all printed pages.
- Now avoids showing orange skin colours on pattern loading.
- Possible crash when loading the print dialog.

Version 1.39 - september 24, 2012

Ability to choose among preset sizes for new patterns.

Ability to flip oblique selected area/object.

Ability to rotate my charm any angle.

Enhanced mat: more colours and textures, now shadowed.

Enhanced full screen mode: pointed colours shows in palette.

Enhanced colours highlighting: added alternate method.

Added Motifs library *Flower 3*.

Version 1.38.01 (unreleased) - september 22, 2012

Addition:

- Preset sizes selection for new patterns.
- Flip oblique for selected area/object (menu and quick edit).
- Flip oblique on insertion of specialty stitch/motif/text.
- Rotation any angle in My charm dialog.
- Motifs library *Flower 3*.

Improvement:

- Now allows undoing underlay picture fading.
- Now allows undoing mat style/silhouette.
- Mats:
 - More colours and textures to choose from.
 - Textured flag no more global, now saved in pattern.
 - Now displays a shadow.
- Quick edit mode for selected area/object:
 - Changed dots colour: yellow=rotate, green=flip.
 - Added flip oblique green dots.
- Full screen mode:
 - Always shows grid center mark.
 - Right click on palette changes font size.
 - Home/end keys show top/bottom colours in palette.
 - Pointed colour automatically highlights in palette.
 - Completed help window.
- Colours highlighting:
 - Hovering over a stitch now previews actual colour.
 - Added another method.
 - Settings are no more global.
- Company logo now prints at 150 dpi (was 600 dpi).
- Updated Dutch language file.

Version 1.38 - september 4, 2012

Ability to use current colour in single colour selections.
Ability to change displayed colours for picture charms.
Ability to change charm objects stacking position.
Ability to highlight selected areas and objects.
Ability to learn the program with downloadable lessons.
Ability to fade animated GIF images for embroidery sequences.
Ability to quickly edit selections and objects with a toolbar.
Enhanced file browser: now includes a text mode.
Enhanced charm definition: more commands and parameters.
Enhanced dialog *My charm*: now handles up to 10" charms.
Enhanced rendering of backstitches with 3D effect 2.
Enhanced rendering of French knots.
Enhanced rendering of embroidery stitches with 3D effect 3.
Enhanced centering of selections and objects: auto pan when required.
Enhanced repeating of objects: increased maximum offset from 5 to 20.
Enhanced undo: now handles pans.
More charms in libraries *Symbols 2* and *Symbols 3*.
More cross stitch textures.
More fading ratios for underlay picture.
Added outline polygon shapes for picture charms.
Added outline picture masks for picture charms.
Added motifs libraries *Colour Variation* and *Rainbow*.
Added charms library *Punched holes*.
Added palette *DMC Polyester (Sewing)*.
And a lot of corrections.

Version 1.37.01 (unreleased) - august 14, 2012

Addition:

- Charms library *Punched holes*.
- More charms in libraries *Symbols 2* and *Symbols 3*.

- Menu *Edit/Selected area/Use current colour*.
- Menu *Edit/Selected charm/Colours*.
- Menu *Edit/Selected charm/Z-Position*.
- Menu *View/Objects/Highlight/When hovering over them*.
- Menu *View/Objects/Highlight/When selected*.
- Menu *Help/myriaCross editor explained*.
- Picture creation tool: fading option for sequences.
- Sticking toolbar for selected area and object.
- More outline shapes or masks for static picture charms.
- 15 more cross stitch textures.
- More fading ratios for underlay picture.

Improvement:

- Smaller and faster code drawing patterns.
- Better quality for printing preview picture.
- Selected area/object may now be highlighted.
- French knots now look a little more like knots.
- Charms definition :
 - May use window work area colour (cutout).
 - May predefine coordinates in catalog section.
 - May be conditional.
 - May specify pen width relative to current grid squares size.
- Better 3D effect 2 for backstitches and 3D effect 3 for stitches.
- Now previews bead colours on hovering as filled circles.
- Increased repeat object maximum possible offsets from 5 to 20.
- Now ensures selection/object is visible after centering (auto pan).
- Now allows undoing pans (multiple pans as a group).
- Huge pattern filling scan stops after 15 seconds.
- My charm size between 10% and 100% by 1% + display of DPI + relative sizes view.
- My charm now handles pictures up to 10" (960 pixels).
- Now ensures embroidery palette follows actual sequence.
- The file browser now includes a text mode.

Correction:

- Could not move selection or object having width=1 or height=1.
- Could not add thread colors to knitting and latch hook patterns.
- Could not add format codes for normal height text in charms.
- Did not update file browser dialog after skin/language change.
- Objects may be wrongly considered in display ⇒ useless redraw.
- Removes unused colours in object when selecting it ⇒ apply pending changes.
- Sometime could not change charms outline and transparency.
- Weird stars in charms library *Symbols 2* when no outline.
- Crash closing a maximized pattern window when more than one window.
- Crash selecting a cross stitch shape when not moving dialog to top.
- Crash changing object repeat count after backstitches dividing/joining.
- Fixed tooltips and actions when something is selected.
- Replacing a blended colour with a single one from a blended palette now works.

Version 1.37 - July 22, 2012

Ability to rotate and flip embroidery/quilting motifs.

Ability to change colour of single colour objects.

Ability to divide and join backstitches.

Ability to move charm objects half a grid square (using Ctrl key).

Enhanced embroidery/quilting panel.

Enhanced legend objects: 2 sizes, linked to palette, contain symbol.

Enhanced charms: may contain variables in text, symbols, numbers.

Enhanced view in perspective.

Added charms libraries *M&J Trimming round buttons*, *Symbols 2* and *Symbols 3*.

And a lot of corrections.

Version 1.36.01 (unreleased) - July 16, 2012

Addition:

- Edit icon and menu in embroidery/quilting panel.
- Single colour objects menu option *Use current colour*.
- Backstitches context menu option *Join backstitches*.
- Backstitches context menu option *Divide backstitches*.
- Menu *Display/Charms/Outline*.
- Menu *Display/Objects/Outline*.
- Menu *Display/Objects/Highlight*.
- Menu *Tools/Options/Behaviour/Stay in selection mode on colour change*.
- Charms libraries *Symbols 2* and *Symbols 3*.

Improvement:

- Changed sequence style selectors to a single icon.
- 3 colours sewing sequence picture thread blocks.
- Increased speed drawing charms.
- Changed *Open folder* buttons to *Green plus* buttons.
- Better width/height ratio for perspective views.
- Legend objects content now linked to palette entries.
- Legend objects colour and symbol follow display mode.
- Normal and half size legend objects.
- Selecting another colour updates legend object preview.
- ESC key leaves legend objects creation mode.
- Charms visible or tooltip text can now contain variables.
- Charms visible text can now contain format codes.
- Charms colours may refer to palette colours.
- Charms may contain colour symbols.
- Charms may contain static texts *1* to *10*.
- Charms may specify origin: no matter, on grid or on hole.
- Charms origin may be dynamically changed (Ctrl + move).
- Charms now use real size for accurate scaling on density change.
- Renamed menu *Edit/Selected available colour* as *Available colours*.
- This menu now shows options even though no colour is selected.
- No more delay filling recent folders and files lists on startup.
- Sequence picture now uses selected background colour.

Correction:

- Sewing sequence arrow start position.
- Erroneous offset when drawing charms.
- Crash searching intermediary RGB colours.
- Crash selecting Edit menu when pattern contains objects.
- Since version 1.34.02, failed creating animated pictures.
- Removes unused colours in objects on load/making selection or object.
- Drag/drop in palette for embroidery/quilting now has no effect.
- Actions and undo for embroidery/quilting update sequence picture.
- Forcing thread colour for quilting avoided colour change.

Version 1.36 - july 2, 2012

Enhanced sewing sequence panel.

Now automatically sets symbol.

A lot of corrections and Improvements.

Version 1.35.02 (unreleased) - june 29, 2012

Addition:

- Banner *The Gift Of Stitching* in the sites panel.
- Banner *Pattern Maker Charts...* in the sites panel.

Improvement:

- More readable thread colours in embroidery sequences.
- Position arrow in sequence during sewing simulation.
- Plays sound when pattern window is fully loaded.
- Avoids cascade zooms using the wheel with embroidery.
- Applies colour operations to all occurrences in objects.
- Automatically sets symbols when inserting a library motif.
- Updates library panel on colour change if at least one single colour motif.

- Updates nothing when selecting current colour in the palette.
- Automatically sets symbol when adding a colour.
- Automatically sets symbols when converting to a thread range or a tint.
- Converting to beads uses original symbols if not Rosace.
- Now shows .uxs files in the file browser.

Correction:

- Pattern preview sizing for quilting patterns.
- Bug in sequence when arranging multiple windows.
- Crash closing pattern window while sewing.
- Crash in sequence with a lot of colours.
- Crash in file browser loading a huge file.
- Merging identical colours locked panels refreshing.
- Motifs library previews could differ from inserted motifs.
- Palette update after picking a colour in underlay picture.
- Some root folders were erroneously considered read-only.

Version 1.35.01 (unreleased) - june 23, 2012

Addition:

- 12 skin tone palettes for new cross stitch patterns.
- Now allows using colours of any palette for motifs.

Improvement:

- Sewing simulation requires far less CPU resource.
- Better visibility of position lines in rulers.
- Easier function selection for quick selection/object edition.
- Moved histogram and sewing simulation icons to embroidery panel.
- Now shows sequence panel with quilting motifs.
- Now hides sequence separate/cumulate selectors when one colour only.

Correction:

- Crash with embroidery sequence when not current window.
- Crash in undo due to a VB bug (calling a menu with no reason).
- Now shows position lines in rulers with black skin.
- Now uses black when no background in full screen view.
- Now shows only stitch points being in current sequence.
- Now forbids opening CyberStitchers/sample patterns twice.
- Now creates no ghost line starting backstitch chain mode.
- Now uses correct cutouts shadow colour in pdf documents.

Version 1.35 - june 19, 2012

Added minimum viewer mode interface on install.

Added menu *Tools/Options/Measurement units*.

Added menu *View/Full screen view*.

Ability to display each sequence for embroidery motifs.

Ability to create animated pictures with embroidery sequence.

Ability to setup additional read-only locks.

Ability to setup a purchase panel and define keys for your customers.

Version 1.34.12 (unreleased) - june 19, 2012

Improvement:

- Purchasable pattern ID may contain a hidden part.
- Customer key filename now contains exposed part of pattern ID.
- Purchase mail message now contains exposed part of pattern ID only.

Correction:

- Possible crash in the pattern windows handler.

Version 1.34.11 (unreleased) - june 17, 2012

Addition:

- Simple interface menu *Help/Check for updates*.
- Simple interface menu *Help/myriaCross web site*.
- Full interface menu *Help/Use simple interface*.

Improvement:

- Added help icon in full screen view.

Correction:

- Removed Wal D'Champs banner in the sites panel.

Version 1.34.10 (unreleased) - june 9, 2012

Improvement:

- Increased symbols size in full screen view colour key.
- Handles accented characters in panel text and customer's name.
- Updated mcck and mCCR tools accordingly.

Version 1.34.09 (unreleased) - june 8, 2012

Addition:

- Simple interface menu option *Display center mark*.

Improvement:

- Print dialog: the list of printers is now sorted.
- Purchase email text files: name is current time, allows more than one open.
- Full screen view now includes colours key.
- Full screen view shortcut key F7.

Correction:

- Print dialog: chosen printer should now select the correct one.
- Purchase email text files: now correctly formatted.

Version 1.34.08 (unreleased) - june 6, 2012

Addition:

- More grid textures (cross stitch: 6, knitting: 1, latch hook: 4).

Improvement:

- Completed palette *Vineyard Silk (Classic)*.
- Completed palette *Vineyard Wool (Merino)*.

Version 1.34.07 (unreleased) - june 5, 2012

Addition:

- Purchase keys save dialog to choose name and folder.
- Scrambling with flying birds purchase panel setup option.
- Now remembers purchase keys folder upon sessions.
- Now able to handle an email instead of a web site.

Correction:

- Stops scrambling pattern picture when unlocked.
- Features using pattern no more interfere with scrambling.
- Updated mcck.exe to disable flying birds.

Version 1.34.06 (unreleased) - may 31, 2012

Addition:

- Placeholders insertion menu for purchase panel text.
- Menu *View/Full screen view*.
- Menu *Help/Repair my customer information* in simple interface.
- Now scrambles pattern picture having *no copy to clipboard* lock.

Version 1.34.05 (unreleased) - may 29, 2012

Addition:

- Minimum viewer mode interface on install.

Correction:

- Now checks for [physical] printers installed before printing.

Version 1.34.04 (unreleased) - may 26, 2012

Addition:

- Menu *Tools/More/Restore my customer information*.
- Now displays current PIN in the about dialog.
- External tool mCCR.exe to create customers repair keys.

Correction:

- Did not first test PIN before unlocking.

- May crash setting too much pages to print.

Version 1.34.03 (unreleased) - may 25, 2012

Addition:

- Default palette Rosace for new patterns.
- Now uses a PIN to unlock purchased patterns.
- Menu *Tools/More/Create a customer purchase key*.
- Section *Advanced/Buy it then stitch it* in the help.

Improvement:

- The purchase page URL text can contain placeholder \$PIN.
- Keeps printers using physical port when PDF or picture creation is locked.
- Printing purchased patterns watermarks with customer information too.
- Completed Dutch language file.

Correction:

- Did not always retrieve pattern name creating purchase key files.
- Purchased keys could be used as base keys.

Version 1.34.02 (unreleased) - may 21, 2012

Addition:

- Picture creation tool now handles animated pictures from sequences.
- Additional read-only locks and purchase panel.
- External command-line tool *mcck.exe* to create customers purchase keys.

Improvement:

- Increased speed generating sequence pictures.
- Now shows information hovering over sequences.
- Better quality for 3D views.

Correction:

- Did not use coloured cursor on sewing simulation with sequences.
- Removed some redraws on undo.
- Now disables picture creation tool *Create* button in demo version.
- No more crashes when editor window is too small.

Version 1.34.01 (unreleased) - may 10, 2012

Addition:

- Menu *Tools/Options/Measurement units*.
- Ability to display each sequence for embroidery motifs.

Improvement:

- Now guesses which palette is used in KG-Chart patterns (DMC or Danish Flower Thread).
- Counts of embroidery/quilting stitches and jumps:
 - Now show in tooltip when hovering over properties icon.
 - Now show when creating a PDF document.
 - Now print in information page.

Correction:

- No more crashes making selection off right or bottom limits.

Version 1.34 - may 9, 2012

Picture conversion:

- Added 2 alternate colour reduction algorithms (A, B, C).
- Added isolated pixels cleaning.

Available colours panel:

- Added buttons Add and Replace and input field to find a reference.
- Added palettes with blends (Anchor, DMC, Hand Dyed Fibers, Lavender & Lace, Rosace, Vineyard).

Other:

- Added pattern properties dialog option *Texture* for mat.
- Added view as 3D option *Perspective*.
- Added backstitches creation mode *on grid*.

Version 1.33.04 (unreleased) - may 9, 2012

Now partially load KG-Chart .sth patterns.

Added 2 colour reduction algorithms.
Added isolated pixels cleaning.
Now standardizes library motifs palette on click.

Version 1.33.03 (unreleased) - may 3, 2012

Addition:

- Palette *Vineyard (Tone on Tone)* with blends by colour family.
- 1 realistic threads texture.

Improvement:

- Completed palette *Vineyard Silk (Classic)*.
- Added floating message when converting whole palette.

Correction:

- No more allows creating backstitches with zero length.
- No more multiple redraws undoing conversion to palette with blends.
- Zoom to whole pattern could show incomplete pattern.
- No more crashes changing possible colours converting clipboard.

Version 1.33.02 (unreleased) - may 2, 2012

Addition:

- Handling for blends in available thread palettes.
- Palette *Anchor* with blends by colour family.
- Palette *DMC* with blends by colour family.
- Palette *Hand Dyed Fibers* with blends by colour family.
- Palette *Lavender & Lace Needlepaints* with blends by colour family.
- Palette *Rosace Cotton* with blends by colour family.
- Backstitches creation mode *on grid*.
- Find reference in available colours panel.
- Shadow feature in perspective dialog.
- Pattern properties dialog option *Texture* for mat.
- 7 new mat shapes.

Improvement:

- Enhanced picture colours reduction.
- Picture colours now numbered from RGB values.
- Perspective dialog now uses graphic buttons.
- Embroidery background texture is less flat.
- Increased speed preparing textures for crosses.
- Now allows merging strictly identical colours.
- Now shows the count of unique colours in the palette tooltip.
- Now shows all blends in information text when hovering over stitches.
- Now shows some pattern properties in tooltip when hovering over icon.
- Now shows some pattern information in tooltip when hovering over icon.

Correction:

- Heart and sun feature disallowed when a pattern is loaded.
- Did not always update selected available colour menu.
- May fail underline the good colour when blended.
- No more allows pasting a charm as selection.
- Saving with enabled highlight altered colours.

Version 1.33.01 (unreleased) - april 19, 2012

Addition:

- Available colours panel buttons Add and Replace.
- 2 more knitting stitch textures.
- 5 more latch hook knot textures.
- View as 3D options *Cylinder* - rear and front.
- View as 3D option *Perspective*.

Improvement:

- Completed main menu section in French help file.
- Added links in main menu section for fast access.

Correction:

- Could no more zoom up to 1000% with wheel or keys.

- Bad programming changing from/to petite stitches.

Version 1.33 - april 15, 2012

Added *Edit* and *View* menus.

Completed *Tools* menu.

Enhanced filling with a motif.

Increased speed displaying transparent charms.

Added new default *Blue* skin.

Version 1.32.04 (unreleased) - april 14, 2012

Addition:

- Paste clipboard button in *My charm* dialog.
- Now displays size in stitches in *My charm* dialog.

Correction:

- Could not modify charms text (bug introduced recently).
- Crashed saving pattern just converted from picture.

Version 1.32.03 (unreleased) - april 14, 2012

Addition:

- Edit menu option *Stitched font*.
- Edit menu option *Pattern properties*.
- Edit menu option *Pattern information*.
- View menu option *Mat*.

Improvement:

- Completed main menu section in English help file.
- Added message when opening specialty stitches panel.

Version 1.32.02 (unreleased) - april 12, 2012

Addition:

- Edit and View menus.
- More options in Tools menu.
- Light blue skin as new default.

Improvement:

- Better visibility of embroidery and quilting stitches in all previews.

Correction:

- Erroneous mouse shape in charms after my motifs.
- Crashed when creating straight backstitches in vertical symmetry mode.
- Failed creating crosses in vertical symmetry mode.
- Crashed when converting to embroidery when lock stitches were off grid.

Version 1.32.01 (unreleased) - april 6, 2012

Addition:

- Zoom factor 175%.

Improvement:

- Increased speed for some functions used a lot:
 - Converting RGB to YCbCr by 69%.
 - Converting YCbCr to RGB by 78%.
 - Testing/limiting number range by 50%.
- Transparent charms display 50% faster.
- Tooltip for first 3 editor icons now tells a popup menu exists.
- Zoom whole pattern may now show with a higher zoom (1% tolerance added).
- Increased filling motifs size up to 30 x 30 stitches.
- Now uses standard method to define filling motifs (left or right click).
- Wider quarter stitches for one realistic texture.

Correction:

- Changing skin when full view exists did not update editor window.
- Missing bead palette in the selection conversion to bead.
- No more crashes converting crosses to beads in selection.

Version 1.32 - april 2, 2012

Now loads Design-A-Knit .pat knitting files.
Now loads Brother .bpt knitting files.
Now loads Portable Bitmap .pbm pictures.
Now loads Kodak PhotoCD .pcd pictures.
Now loads Portable Greymap .pgm pictures.
Now loads Portable Pixelmap .ppm pictures.
Added option *Outline* in the picture setting mode.
Added option *Add this floss/bead to my stock* in available colours menu.
Added option *Remove this floss/bead from my stock* in available colours menu.
Added option *Edit my stock...* in available palettes menu.
Added option *Use colours I have in stock* in current palette menu.
Added option *Edit my stock...* in current palette menu.
Added menu *Tools/More/Update my stock from myriaCross Floss stock*.
Added menu *Tools/More/Update myriaCross Floss stock from my stock*.
Added motifs library *Corners*.
Added frames *Wood frame 6, Wood frame 7*.
Enhanced security printing read-only protected patterns.

Version 1.31.06 (unreleased) - april 1, 2012

Addition:

- Picture setting mode option *Outline*.
- Now loads Design-A-Knit .pat knitting files.
- Now loads Brother .bpt knitting files.
- Now loads Portable Bitmap .pbm pictures.
- Now loads Kodak PhotoCD .pcd pictures.
- Now loads Portable Greymap .pgm pictures.
- Now loads Portable Pixelmap .ppm pictures.
- Frames *Wood frame 6, Wood frame 7*.

Improvement:

- Increased speed displaying full view using faster rendering mode.
- The stock dialog is now sizable.
- Added palette names in the stock list.

Correction:

- Now uses default 5 count fabric when loading knitting files.
- By-position black symbols were erroneous for knitting and latch hook.
- Actual size opening a picture may duplicate an existing size.
- Changing language altered tool icons in picture settings mode.
- Creating animated picture was disabled if beads are in objects only.
- Removing hidden backstitches was disabled if backstitches are in objects only.
- Ensures watermark visibility by disallowing textures when printing protected patterns.

Version 1.31.05 (unreleased) - march 29, 2012

Addition:

- Menu *Tools/More/Update my stock from myriaCross Floss stock*.
- Menu *Tools/More/Update myriaCross Floss stock from my stock*.

Improvement:

- Setting mode: exchanged position of actual/possible colours.
- Completed Dutch language file.

Correction:

- Actual size opening a picture now honors the 999 pixels limit.
- Editing my stock from palette menu now sorts records.

Version 1.31.04 (unreleased) - march 27, 2012

Addition:

- Opening a picture now includes actual size if lower than 999.
(Allows setting size and colours count with external program)
- Available colours panel previews show tooltips for stock.

Correction:

- Runtime error 6 (overflow) when underlining colours.

Version 1.31.03 (unreleased) - march 26, 2012

Improvement:

- Stock database format handles future additions.
- Usage dialog now shows stock information as tooltip.
- Stock dialog now accepts clicking on colour previews.
- Stock dialog now auto focuses when moving the mouse.
- Now shows *in stock* mark for colours with unknown RGB.

Addition:

- Current palette menu option *Use colours I have in stock*.
- Current palette menu option *Edit my stock...*

Correction:

- Did not show 4th sub entry in the usage dialog.
- Typos in reference list of palette keys.

Version 1.31.02 (unreleased) - march 24, 2012

Addition:

- Available palettes menu option *Edit my stock...*
- Available colours menu option *Add this floss/bead to my stock*.
(Also works with Ctrl+left click on colour preview)
- Available colours menu option *Remove this floss/bead from my stock*.
(Also works with Ctrl+right click on colour preview)
- Available colours in stock show with a white square.
(Also shows in floss and bead usage dialog)

Correction:

- Typos in reference list of palette keys.

Version 1.31.01 (unreleased) - march 22, 2012

Improvement:

- Completed German and Dutch language files.
- Background picture during the CD setup installation.

Addition:

- Now underlines found colour in palette when hovering over stitches.
- Motifs library *Corners*.

Correction:

- Cross Stitch Pro patterns may contain ":" before colour numbers.
- May not actually activate default window on cascade/mosaic - Windows bug.
- Externally loading a pattern did not update palette due to above bug.

Version 1.31 - march 20, 2012

Improvement:

- Creating a PDF document now includes cloth count in size information.
- Creating a PDF document now includes full pattern with B/W symbols.
- More accurate loading of Cross Stitch Pro .xsp pattern files.
- Completed palette *Kreinik*.

Addition:

- Menu *Options/Language/Fast loading*.
- Menu *Tools/More/Retrieve Cross Stitch Pro uncompressed patterns*.
- Menu *Tools/More/Translation: summarize languages content*.
- Settings dialog option *1, 2, 3, 4, 5, ...*: black symbols are position in palette.
- Loading of Cross Stitch Pro .xsm motif files.
- Palette *Kreinik (Iron-On Colors)*.
- Palette *Kreinik (Machine Sewing)*.
- Charms library *Wichelt*.
- Fabrics palette *Wichelt Aida 6ct*.
- Fabrics palette *Wichelt Aida 8ct*.
- Fabrics palette *Wichelt Klostern 7ct*.

Version 1.30.05 (unreleased) - march 19, 2012

Improvement:

- Completed palette *Kreinik*.

- Added palette *Kreinik (Iron-On Colors)*.
- Added palette *Kreinik (Machine Sewing)*.

Addition:

- Menu option *Tools/More/Translation: summarize languages content*.

Correction:

- A lot of typos in language files.

Version 1.30.04 (unreleased) - march 18, 2012

Improvement:

- Better visibility of backstitches in all previews.
- Copyright string in PDF document now begins with *Copyright ©*.
- Creating a PDF document now includes cloth count in size information.
- Creating a PDF document now includes full pattern with B/W symbols.

Addition:

- Setting option *1-2-3*: black symbols are position in palette.

Correction:

- Loading ILSof/STitchCraft patterns may fail finding DMC descriptions.
- Creating a PDF document uses style colour for cutouts in the fabric.
- Did not show symbol in colour preview when hovering in black symbols mode.

Version 1.30.03 (unreleased) - march 16, 2012

Correction:

- Now uses DMC palette when reading Cross Stitch Pro patterns.
- Cross Stitch Pro patterns may use declared unused colours.
- Now allows converting to embroidery, knitting and latch hook in demo version.
- Now refreshes the editor window icons before displaying the window.

Version 1.30.02 (unreleased) - march 15, 2012

Improvement:

- Now loads Cross Stitch Pro .xsm motifs though undocumented.
- Added handling for custom tools for authorized users.

Correction:

- Could not load some Cross Stitch Pro patterns.

Version 1.30.01 (unreleased) - march 12, 2012

Improvement:

- Menu *Options/Language/Fast loading*.
- First version of German help file.
- Completed German and Portuguese language files.

Addition:

- Charms library *Wichelt*.
- Fabrics palette *Wichelt Aida 6ct*.
- Fabrics palette *Wichelt Aida 8ct*.
- Fabrics palette *Wichelt Klostern 7ct*.

Correction:

- Changing skin fully updates the colour properties panel.

Version 1.30 - march 9, 2012

Improvement:

- Now adjusts position in palette when picking a colour.
- Completed German language file.
- Completed palette *Anchor*.

Correction:

- Installation method for mouse wheel OCX library.

Version 1.29 - march 7, 2012

Addition:

- Motif libraries menu option *Use pattern colours*.

Correction:

- Removed 2 erroneous empty fabric palettes.

- No more uses current colour when single colour motifs use beads.

Version 1.28 - february 29, 2012

- Now handles curve style when converting backstitches to embroidery.
- Now handles loading of DigiStitch .ptn pattern files.
- Now allows changing curve style with Space key when creating backstitches.

Version 1.27.01 (unreleased) - february 20, 2012

Improvement:

- Now accurately converts curved backstitches to embroidery stitches.
- Now hides jumps, stitch points and commands when creating PDF document.
- Now shows colours content in the colour range selection dialog.
- Now uses default WinCrea colours palette when opening .cut files.

Correction:

- No more loses current colour after a stitch insertion - [introduced in v1.26.02]
- No more fails initializing palette when using user-defined order.
- No more converts to an undefined colour.
- No more keeps the double char symbols when converting from Rosace to another range.

Addition:

- Now loads DigiStitch .ptn pattern files.
- Option *Segments length for curved backstitches* in the embroidery conversion dialog.
- Hitting space key in backstitch creation mode toggles curve style.

Version 1.27 - february 13, 2012

Added ability to create PDF documents.

Added ability to specify maximum embroidery stitches length.

Added ability to drop handled files on main window for loading.

Introduced decimal sizes for embroidered crosses.

Version 1.26.02 (unreleased) - february 7, 2012

Improvement:

- Saving to embroidery divides sewn stitches according to chosen maximum length.
- PDF document displays palette colours in current order.
- PDF document handles all palette colours on additional pages.
- PDF document displays the copyright message if any on every page.
- PDF document may be opened with default reader.
- PDF document creation settings now remembered.
- Tooltip shows the count of colours in current pattern palette.
- Tooltip shows the count of colours in current available colours palette.

Correction:

- No more misses some embroidery stitches.
- Generates accurate embroidery lock stitches.
- Avoids a crash by checking palette for 24-bit colours on class initialization.

Addition:

- Options *Maximum stitches length* in the settings dialog - Requested by Ineke.

Version 1.26.01 (unreleased) - february 1, 2012

Correction:

- Saving as KnitPad .nit missed bottom left stitch - Reported by Sabine.
- Converting to embroidery did not remember strands - Reported by Sabine.

Addition:

- Menu option *File/Create a PDF document* - Requested by Sabine.

Version 1.26 - january 31, 2012

Added knitting patterns edition.

Added latch hook patterns edition.

Added ability to embed symbol fonts.

Added palette colour drag and drop for options with 2 colours.

Added filling feature *Fill empty grid with current colour*.

Added underlay picture rotation and mirror features.

Added knitting and latch hook thread ranges.

Version 1.25.12 (unreleased) - january 30, 2012

Improvement:

- My buttons and charms now contain an editable tooltip text.
- New knitting pattern palette default is *Red Heart (Classic)*.
- Handles actual extent black block for card printing.
- Printing cards forces paper orientation adjustment to fit.
- Increased speed generating coloured texture grid.

Correction:

- Possible bug reducing source window on conversion.
- No mouse shortcut for knitting and latch hook.
- Knitting and latch hook colour palette printing.
- Knitting card 2 colours printing.

Addition:

- Content-specific user-saved palettes for new patterns.

Version 1.25.11 (unreleased) - january 28, 2012

Improvement:

- Colour range selection when converting content - stored.
- Unhides selected colour range when converting content.
And defaults to this range if the colours panel is open.
- Latch hook cursor shape for latch hook edition mode.
- Latch hook pre-cut length displayed and printed in floss usage.
- Better coding leads to 72 KB smaller .exe file.
- Changed underlay size setting to actual pattern size.
- Added flip and rotate features for underlay picture.
- Ask for confirmation before clearing recent files list.

Correction:

- Cannot paste different contents.
- Cannot create specialty stitches with knitting or latch hook.
- Bugs converting to knitting or latch hook.
- Bug finding colour on the fly.

Addition:

- Content-specific motif libraries.
- Pre-cut length selection in the colour properties panel.
- Rendering as blocks/3D Effect shows knots length.
- Menu option *File/Open recent folder*.
- Menu option *Window/Whole pattern*.

Version 1.25.10 (unreleased) - january 25, 2012

Improvement:

- Now handles a latch hook usage flag in palettes.
- Rendering knitting stitches and latch hook knots with 3D effect.

Correction:

- Set latch hook flag in palette *MCG Textiles Rug Yarn*.
- Did not update compiled file when changing language.

Addition:

- Palette *Herrschners Rug Yarn*.
- Palette *Mary Maxim Rug Yarn*.
- Palette *Shillcraft Rug Yarn (Acrylic)*.
- Palette *Shillcraft Rug Yarn (Wool)*.

Version 1.25.09 (unreleased) - january 24, 2012

Correction:

- Latch hook patterns may only be saved in .mcpat format.

Addition:

- Editor window icon depends on content type.
- Menu option *File/Convert to cross stitch*.
- Palette *Red Heart (Soft Touch)*.

- Palette *Red Heart (Soft)*.
- Palette *Red Heart (Sport)*.

Version 1.25.08 (unreleased) - January 23, 2012

Improvement:

- Ability to create new knitting or latch hook patterns.
- Content-specific fabric size/density and default palette.
- Ability to compile language files for faster loading.

Addition:

- Handling for latch hook motifs.
- Menu option *File/Convert to latch hook*.
- Fill tool menu option *Fill empty grid with current colour*.

Version 1.25.07 (unreleased) - January 20, 2012

Improvement:

- Bigger symbols in the colour properties panel.

Correction:

- Crash in dialog *new* when user palettes exist - Reported by Jacqueline.

Addition:

- Palette *Red Heart (Fiesta)*.
- Palette *Red Heart (Foxy)*.
- Palette *Red Heart (Kids)*.
- Palette *Red Heart (LusterSheen)*.
- Palette *'Red Heart (Shimmer)*.
- Palette *Red Heart (Small Skein Super Saver)*.
- Palette *Red Heart (Smoothie)*.

Version 1.25.06 (unreleased) - January 19, 2012

Improvement:

- Grid density between 3 and 40 stitches per inch.
- Knitting motifs use their own tools palette.
- Knitting motifs default to 5 stitches/inch.

Correction:

- 2 possible crashes when converting to knitting.
- No more allows converting embroidery to knitting.

Addition:

- Drag & drop palette colours menu option *Intermediary colours*.
- Palette *Red Heart (Chunky)*.
- Palette *Red Heart (Classic)*.
- Palette *Red Heart (Comfort Chunky)*.
- Palette *Red Heart (Comfort Sport)*.
- Palette *Red Heart (Comfort)*.
- Palette *Red Heart (Designer Sport)*.

Version 1.25.05 (unreleased) - January 18, 2012

Correction:

- Possible crash saving objects to pattern file.
- Reads .pal files made by PhotoShop for .cut files.
- No more 2-characters symbols reading .cut files.

Addition:

- Drag & drop palette colours menu option *Exchange colours*.
- Drag & drop palette colours menu option *Replace colour*.

Version 1.25.04 (unreleased) - January 17, 2012

Correction:

- Bug reading some .nit knitting files.
- Disabled some options for knitting motifs.

Addition:

- Loading and saving Passap .cut knitting files.
- Knitting uses its own textures.

- Printing as knitting card for Passap E6000.

Version 1.25.03 (unreleased) - January 14, 2012

Improvement:

- Completed palette *Rainbow Gallery (Splendor)*.

Correction:

- Displays symbol ? when font is not available.

Addition:

- Handling for knitting motifs.
- Batch conversion of KnitPad .nit files to myriaCross.
- Loading and saving KnitPad .nit knitting files.
- Section *Menus/Main menu* in the help file.

Version 1.25.02 (unreleased) - January 10, 2012

Improvement:

- Arranged read/write options in menu *Behaviour*.
- Completed palette *Rainbow Gallery (FyreWerks)*.
- Completed palette *Rainbow Gallery (Neon Rays)*.
- Completed palette *Rainbow Gallery (Neon Rays+)*.
- Completed palette *Rainbow Gallery (Silk Lame Braid #13)*.
- Completed palette *Rainbow Gallery (Silk Lame Braid #18)*.
- Completed palette *Rainbow Gallery (Very Velvet)*.

Addition:

- Ability to embed symbol fonts when saving as PCStitch 9.
- Menu option *Behaviour/Embed symbol fonts in pattern file*.
- Palette *Rainbow Gallery (Petite Silk Lame Braid #18)*.

Version 1.25.01 (unreleased) - January 9, 2012

Correction:

- Did not load PCStitch 9 patterns with embedded fonts.

Addition:

- Handles symbol fonts embedded in PCStitch patterns v9.

Version 1.25 - January 4, 2012

Added objects repeat style.

Added saving as .exp, .jef, .ksm, .pcs and .10o embroidery files.

Version 1.24.01 (unreleased) - January 4, 2012

Correction:

- Information dialog for new pattern now centers in owner window.
- Now preserves user-defined fabric colour on pattern loading.
- Erroneous colour change in conversion to embroidery.

Addition:

- Objects repeat style.
- Christmas bonus patterns as sample patterns.
- Christmas bonus stitched fonts.

Version 1.24 - December 23, 2011

Mostly corrections.

Version 1.23.01 (unreleased) - December 22, 2011

Improvement:

- Completed help files.
- Now allows up to 40 stitches per inch.
- Now adds a margin around when loading quilting motifs.
- Reduced size of page number texts in printed cover page.

Correction:

- Closing text object menu no more zooms out.
- Now displays coordinates in current units for quilting motifs.
- Pattern preview in printed cover page for unequal fabric counts.

Addition:

- Now loads myriaCross .uxs pattern files.
- Fabrics palette Wichelt Linen 35ct.
- Fabrics palette Wichelt Linen 40ct.

Version 1.23 - december 16, 2011

Added limit axes for selections and objects.

Added setting option for mouse cursor shapes.

Added objects rotation and mirror from preview corners.

Added backstitch tool menu option *Change creation order*.

Added backstitch edition menu options *Move to foreground/background*.

Added pages locator in printed cover page preview.

Added mirror printing mode.

Version 1.22.03 (unreleased) - december 16, 2011

Improvement:

- Increased rendering speed for crosses.

Correction:

- Objects tooltip might blink with some cursors.
- Objects tooltip might not appear though required.
- Some setting changes might not refresh selected item.

Addition:

- Limit axes for selections and objects.
- Ctrl+A toggles between thin/thick/disabled axes.
- Setting option for mouse cursor shapes.
- Objects rotation and mirror from preview corners.
- Quick edit section in the help.

Version 1.22.02 (unreleased) - december 12, 2011

Improvement:

- Bigger and in context mouse cursors.
- Changing some print settings updates cross size display.
- Mirror printing: scale only displayed in preview.
- More accurate conversion of backstitches to embroidery.
- Constant 15% faster rendering with textured cross stitches.
- Best rendering speed by ignoring invisible stitch types.
- Printing: page numbering begins with 1st pattern page.

Correction:

- Startup dialog now entitled *Startup*.
- Erroneous startup dialog sizing for some languages.
- Forces white background for cutouts in cover page.
- No more hot keys in the startup dialog.
- Erroneous conversion of quarter stitches to Cross Stitch Pro.
- Could fail chaining curved backstitches for conversion to embroidery.
- Would fail chaining backstitches if more than 255 colours.
- Ctrl+Z sometime triggered more than one undo.
- Saving a stitched font to all but .mcpat turned it to a pattern.

Addition:

- Pages locator in printed cover page preview.
- Undocumented reading of Cross Stitch Pro .xsp, .xsu patterns.
- Backstitch tool menu option *Change creation order*.
- Single backstitch edition menu options *Move to foreground/background*.

Version 1.22.01 (unreleased) - december 6, 2011

Correction:

- Auto open no more displays startup dialog.
- Did not refresh symbols on symbol font selection.

Addition:

- Mirror printing mode.

Version 1.22 - december 5, 2011

Enhanced text tool with system fonts.
Corrected font creation tool.
Added startup dialog.
Added charm libraries *Hearts* and *Pins*.

Version 1.21.01 (unreleased) - december 3, 2011

Improvement:

- Actual sizes for system fonts in text toolpanel.
- Better rendering of texts in Post-it notes.

Correction:

- Handle undefined characters in font creation tool.
- Skin dependent colour for legends in My charm.
- Crash changing colour in text tool with system font.

Addition:

- Charm libraries *Hearts* and *Pins*.

Version 1.21 - december 2, 2011

Added menu *Tools/Stitched font creation tool*.
Added palette menu option *Create a legend for this colour*.
Added beads palette *Mirabilia Pony Beads*.
Added fabrics palette *Wichelt Hardanger 22ct*.
Added fabrics palettes *Wichelt Linen 26, 28, 30, 32ct*.

Version 1.20.02 (unreleased) - december 1, 2011

Correction:

- Erroneous protection reading some PCStitch 10 patterns.
- No more black fabric for converted PCStitch stitched fonts.
- Bug in text parsing function could fail loading patterns.

Addition:

- Font preview in stitched font creation dialog.
- 9 more stitched font creation styles.
- Palette *Mirabilia Pony Beads*.

Version 1.20.01 (unreleased) - november 30, 2011

Improvement:

- Now stores full fabric information in PCStitch patterns.
- Better rendering of transparent texts in objects.
- Even better rendering disabling transparency when not required.

Correction:

- Always updates display after welcome window closes.
- No more watermarks motifs and charms in panels.
- Changing skin updates visible RTF windows.
- Closing RTF windows frees used memory.
- Company logo no more hidden by cover text in information dialog.
- Moving over *use notes as cover text* no more shows the logo.
- No more resets white fabric when loading a PCStitch pattern.

Addition:

- More commands in charm definition files.
- Menu *Tools/Stitched font creation tool*.
- Palette menu option *Create a legend for this colour*.
- Palette *Wichelt Hardanger 22ct*.
- Palettes *Wichelt Linen 26, 28, 30, 32ct*.

Version 1.20 - november 26, 2011

Corrected crash right clicking on unused region of current object.
Added menu *Options/Undo* as a workaround for a Windows bug.
Added magnified view in symbols table.
Added black skin.

Version 1.19 - november 24, 2011

Added cover page text.

Added palette printing both at right and on separate page.

Added objects repeating.

Added 5 specialty stitches.

Added frame style *Wooden 9*.

Added palette *Madeira Polyester (Glamour)*.

Added section *How to ...* in help files.

Version 1.18.04 (unreleased) - november 24, 2011

Improvement:

- Detects objects from stitches, no more from bounding box.
- Better visibility of selected object bounding box.

Version 1.18.03 (unreleased) - november 23, 2011

Improvement:

- Moves cursor to calling icon on dialog close.
- Forces white embroidery background in cover page thumbnail.
- Forces wider embroidery stitches in cover page thumbnail.
- Added section *How to ...* in help files.

Correction:

- No more colour picker options menu for embroidery/quilting.
- Bug in palette printing quilting motifs with cover page.

Addition:

- Palette *Madeira Polyester (Glamour)*.

Version 1.18.02 (unreleased) - november 21, 2011

Correction:

- Bug changing background colour after print.
- Did not update display after palette standardization.

Addition:

- Cover text placement in the print dialog.
- Ability to use notes as cover page text.
- Now handles undo for objects repeating.
- 5 specialty stitches (Lazy daisies, Knotted diamond).

Version 1.18.01 (unreleased) - november 19, 2011

Improvement:

- Printing of pattern title and author.

Correction:

- Potential bug with blinking rectangles position.
- Bug while converting crosses to beads.

Addition:

- Now handles repeated objects.
- Cover page text in the pattern information dialog.
- Frame style *Wooden 9*.

Version 1.18 - november 17, 2011

Added menu Tools/Picture creation tool.

Added cover page option in the print dialog.

Added link to manufacturer's site in the colours panel.

Added 16 sample patterns for biscornus.

Added 6 specialty stitches.

Added 5 transparent stitch textures.

Added palette *SJ Designs 11-0 Plated Seed Beads*.

Added palette *SJ Designs 11-0 Satin Seed Beads*.

Version 1.17.04 (unreleased) - november 17, 2011

Improvement:

- Now views as biscornu or cube even if not square.

- Now shows grid texture in view as 3D object.
- No size restriction for view as biscornu or cube.
- Updated help files.

Correction:

- Potential bug in colour highlighting.
- Could not always remove default company logo.

Addition:

- 16 sample patterns for biscornus.
- 6 specialty stitches (Cashmere, Rice, Lazy daisies).

Version 1.17.03 (unreleased) - november 15, 2011

Correction:

- No more locks patterns in My pictures.

Addition:

- Added whole pattern option in picture creation tool.
- Now allows choosing folder and filename in picture creation tool.
- Added cover page in print dialog.

Version 1.17.02 (unreleased) - november 13, 2011

Correction:

- Standardized dialogs: cancel button always leftmost.
- Copying floss usage to clipboard triggers a sound.
- Copying 3D view twice no more displays erroneous message.
- Opening the colour properties panel defaults to strands.
- Opening the sites panel defaults to myriaCross banner.
- No more requires saving when only zoom and/or pan changed.
- Selecting tool or colour requires saving since stored in pattern.

Addition:

- 5 transparent stitch textures.

Version 1.17.01 (unreleased) - november 10, 2011

Correction:

- Now ensures default strands counts are defined.
- Now ensures patterns contain at least one colour.
- No more locks patterns in read-only sub folders of My documents.
- Completed palette *SJ Designs 11-0 Glass Seed Beads*.
- Completed palette *SJ Designs 14-0 Glass Seed Beads*.

Addition:

- Menu Tools/Picture creation tool.
- Palette *SJ Designs 11-0 Plated Seed Beads*.
- Palette *SJ Designs 11-0 Satin Seed Beads*.

Version 1.17 - november 9, 2011

Backstitches tool menu now shows active option.

Added 2 curved backstitches shapes.

Added 6 grid textures.

Added 2 bead textures.

A lot of corrections.

Version 1.16.03 (unreleased) - november 9, 2011

Added realistic beads texture in the settings dialog.

Corrected mirroring of curved backstitches in symmetry mode.

Corrected manufacturer information saved to PCStitch palettes.

Brightened texture for beads in palettes.

Version 1.16.02 (unreleased) - november 8, 2011

Corrected backstitch style saved to PCStitch.

Added 2 curved backstitches shapes.

Version 1.16.01 (unreleased) - november 7, 2011

Improvement:

- Now supports 256 colours grid textures.

Correction:

- Possible erroneous files version detection.
- Possible jump to button in settings dialog.
- No more changes stitched font unique colour if a bead.
- Beads sparkling now pauses in chained backstitch mode.
- Mouse wheel no more triggers zooms when a button is down.
- Did not always retrieve colour for French knots and beads.
- No more removes palette entry on specific deletion if used by objects.

Addition:

- 6 new grid textures.

Version 1.16 - november 4, 2011

Now loads PCStitch files version 10.

Added colours in generic fabric palette.

Now uses blinking rectangles for selected items in panels.

Version 1.15 - november 2, 2011

Cut fabric regions: new creation mode.

Cross stitches: new conversion to beads.

Backstitches: new property: curve shape.

French knots: deletes existing one underneath.

Beads: deletes existing one underneath; faster rendering; new sparkling effect.

Objects: enhanced bounding box preview.

Copy to clipboard: new setting for background colour.

View as 3D object: new setting for quality.

More palettes and specialty stitches.

Version 1.14.06 (unreleased) - november 1, 2011

Improvement:

- Updating recent files list no more slows down the program.
- Creating a French knot now deletes existing one underneath.
- Creating a bead now deletes existing one underneath.
- Increased speed rendering beads and adding sparkles.

Correction:

- Sometime bad blinking area for frame or mat selection.
- Displaying context menus did not resume sparkling.
- Undo did not always redraw function and colour palettes.
- Error mirroring curved backstitches vertically.

Addition:

- Beads sparkling effect in the settings dialog.
- Selection icon menu option *Global change/Convert crosses to beads*.
- Selection area menu option *Edit selection/Convert crosses to beads*.

Version 1.14.05 (unreleased) - october 31, 2011

Improvement:

- Blinking area for pointed objects, cutouts and full view.
- Better timing for beads sparkling effect.

Correction:

- Print preview did not use window background colour for cutouts.
- Sometime did not find crosses pen in objects.

Addition:

- Palette *DMC Cotton Embroidery*.

Version 1.14.04 (unreleased) - october 29, 2011

ESC key now aborts stitched shape creation mode.

Now shows cutouts bounding box when moving over them.

No more allows creating cutouts up to pattern edges.

No more includes cutouts in converted embroidery motifs.

Added selection icon menu option *Global change/Cut unused regions of the fabric*.
Added fabric texture in the pattern properties dialog.
Added background colour option when copying to the clipboard.
Added sparkling effect on beads.

Version 1.14.03 (unreleased) - october 27, 2011

Corrected bugs printing with unequal grid resolution.
Corrected reading of cutouts in StitchCraft charts.
Now draws black cutouts in 3D object views.
No more loses control when dragging off pattern area.
Now finds curved backstitches when moving over them.
Watermark now shows on dark backgrounds.
Watermark now shows in picture corners too.
Added option *Quality* for view as 3D object.
Added palette *DMC Cotton Quilting*.

Version 1.14.02 (unreleased) - october 25, 2011

Improvements loading PCStitch patterns.

Curved backstitches:

- Curve 1 ⇒ convex curve.
- Curve 2 ⇒ concave curve.
- Now handles endpoints offset.
- Now handles flip and rotate.

Backstitches icon tools menu:

- Added option *Curved backstitches (convex)*.
- Added option *Curved backstitches (concave)*.

No more changes default palette reference when changing in a pattern.

Added specialty stitches:

- Lazy Daisy Curved Stitch.
- Hardanger Dove Eye Curved.

Version 1.14.01 (unreleased) - october 24, 2011

Added curved backstitches.

Version 1.14 - october 23, 2011

Settings dialog: 14 more textures for crosses; changes apply immediately.

Charms and motifs: displays size and warns when greater than pattern.

Underlay picture: allows adjusting size and position to grid.

Selected area: more editing options.

Colour picker tool: more options.

View as 3D object: view as cylinder.

More thread and fabric palettes.

Version 1.12.05 (unreleased) - october 22, 2011

Added edit options in the selection menu:

- Convert crosses to 4 petite stitches.
- Convert all stitches to petite stitches.
- Convert petite stitches to quarter stitches.

Now allows viewing as a cylinder regardless of size.

Added fabric palettes Wichelt Aida 11, 14, 16 and 18ct.

Added 7 frame shapes.

Version 1.12.04 (unreleased) - october 20, 2011

PCStitch patterns:

- Now loads underlay picture (v9 only).
- Now loads company logo picture (bmp, gif, jpg, png or tif).
- Now saves company name.
- Now saves company logo picture (jpg).

Increased speed rendering embroidery and quilting motifs.

Decreased executable file size by disabling internal debug mode.

Version 1.12.03 (unreleased) - october 19, 2011

Added setting for underlay position and size in stitches.
Now allows viewing square patterns as cylinders.
Added motifs library *Blackwork 2*.
Corrected potential bugs (ghost pictures).

Version 1.12.02 (unreleased) - october 17, 2011

Improvements loading PCStitch patterns.
Now undoes palette standardization.
Now handles & in filenames wherever it appears.
Corrected a crash setting hot key when no pattern.

Version 1.12.01 (unreleased) - october 16, 2011

Added options in menu *Options/Behaviour*:

- *Allow symbols display for textured stitches.*
- *Standardize palette on loading.*

Added palette menu option *Standardize palette*.

Added picker tool menu options:

- Capture as RGB colour.
- Convert to current palette.
- Create stitch (or bead) on capture.

Settings dialog:

- Added 14 textures for crosses.
- Simplified scrolling down/up of textures selection images.
- Now applies changes immediately.

Stitches, motifs, charms and texts panels:

- Now auto moves mouse cursor to panels when opening them.
- No more refreshes panel after item insertion - useless.

Charm and motif panels:

- Now displays size in tooltip.
- Now warns when size is greater than pattern.

Misc:

- Picked underlay colours could not be used for specialty stitches.
- Increased speed rendering textured crosses.
- Now disallows textured cross rendering in picture conversion mode.
- Added palette *Fil Marion*.
- Added palette *Hanah Silk Ribbons*.

Version 1.12 - october 10, 2011

Now allows rendering fabrics with 30 styles.
Now allows realistic rendering for crosses.
Now allows offsetting backstitches endpoints.
Now allows seeing beads as beads in available palettes.
Now allows faster selection of colour ranges to show.
Now allows setting outline shape for picture charms.
Now allows setting transparency for picture charms.
Added specialty stitches for hardanger.

Version 1.11.06 (unreleased) - october 10, 2011

Added options in *Colour ranges to show* dialog.
Added specific rendering for beads in palettes.
Completed palette *Miyuki Delica Beads*.
Completed palette *Thread Gatherer (Silkn Colors)*'.

Version 1.11.05 (unreleased) - october 8, 2011

Selected object did not print or show in full view.
Added charms menu option *Outline* for picture charms.
Added charms menu option *Transparency* for picture charms.
Added specialty stitch *Hardanger Star Stitch*.

Version 1.11.04 (unreleased) - october 7, 2011

Corrected a bug creating backstitches.
Corrected a bug undoing backstitches in chain mode.
Corrected a bug displaying grid texture on loading.
Now displays cutouts above underlay picture.
Added 5 charm pictures (Arrows and List) in library *Symbols*.
Added 10 sample biscornus from Wal D'Champs.

Version 1.11.03 (unreleased) - october 6, 2011

Settings dialog:

- Added option *Display grid/Texture*.
- Added 30 grid textures with contrast setting.
- Removed option *Display grid/Hardanger style*.
- Corrected icons for colours, contrast and brightness.

Version 1.11.02 (unreleased) - october 3, 2011

Corrected symmetrical stitches creation algorithm.
No more draws symmetry axes on motif preview.
No more allows stitches inside holes in fabric:

- On stitches creation, even in symmetry mode.
- On shapes with cross stitches creation, even in symmetry mode.
- On paste and object merge.
- On holes creation.

Specialty stitches:

- Added Hardanger Cable Stitch Over 1, Over 2.

Version 1.11.01 (unreleased) - october 3, 2011

Settings dialog:

- Added option *Display grid/Hardanger style*.
- Added option *Backstitches/Offset endpoints*.

Specialty stitches:

- Added Hardanger Button Hole, Hardanger Frame Stitch, Hardanger Square.
- Corrected Queen Stitch, Spiral Over 3, Tied Down Cross, Triangle Stitch.
- Removed Button Hole, Hardanger Cable.

Version 1.11 - october 1, 2011

Now allows creating holes in the fabric for hardanger.
Now allows creating shapes with cross stitches.
Now allows deleting hidden backstitches.
Now allows setting default palette from 12 more manufacturers.
Now allows setting default company logo.
Now allows displaying available palettes in original order.
Now allows printing with resolution up to 3600 dpi.
Now allows printing rulers around the pattern.
Now allows printing palette at right of the pattern.
Now allows converting pictures to up to 500x500 stitches.
Now allows viewing as 3D object up to 200x200 stitches.

Version 1.10.06 (unreleased) - october 1, 2011

Now accurately names new patterns (New1, New2, ...).
Added backstitches menu option *Delete hidden backstitches*.
Corrected drawing of joins for cut regions shadow.
No more looses position in specialty stitches list.
Added 12 specialty stitches for hardanger.
Corrected a bug saving specialty stitches.
Corrected a bug undoing object insertion.

Removed ugly sound effect when creating cross stitch shapes.
Added menu *Selection/Cut or restore regions of the fabric*.

Version 1.10.03 (unreleased) - september 26, 2011

Avoids crashes by activating editor window on button clicks.
Corrected a possible crash undoing palette changes.
Now allows converting pictures to up to 500x500 stitches.
Now allows viewing as 3D object up to 200x200 stitches.
Increased speed finding colours usage.
⇒ Increased speed saving patterns.
⇒ Increased speed converting to embroidery.
⇒ Increased speed merging identical colours.
⇒ Increased speed deleting unused colours.
Now handles printing resolution up to 3600 dpi.
Added pattern printing option *Rulers*.
Added palette printing option *At right of pattern*.
Added default palette for 12 manufacturers.
Added mat styles *Star 4~6*.
Added cross stitch shapes *Star 4~6, Corner 1~4*.
Completed selection size tooltip text.

Version 1.10.02 (unreleased) - september 24, 2011

Added shapes creation with cross stitches.
Now disables autosave for read-only patterns.

Version 1.10.01 (unreleased) - september 22, 2011

Now allows setting default company logo.
Completed palette Hand Dyed Fibers.
Completed Dutch language file.

Version 1.10 - september 21, 2011

Added picture scale setting in *My charm* dialog.
Removed infinite loop watermarking tiny patterns.
Completed Dutch language file.

Version 1.09 - september 19, 2011

Now allows using its own company logo.
Now allows watermarking patterns with copyright information.
Now allows viewing square patterns as biscornu or cube.
Added Dutch version.

Version 1.08.06 (unreleased) - september 19, 2011

Added a button to add misc information in pattern notes.

Version 1.08.05 (unreleased) - september 18, 2011

Added option *Print using my company logo* in the information dialog.
Added option *View as cube*.
Now darkens biscornu and cube faces.
Now shows visual quarter stitch locator when holding down mouse button.
Corrected typo *counts* to *count* in English version.

Version 1.08.04 (unreleased) - september 17, 2011

No more crashes or fails printing at 600, 1200 and 2400 dpi.
No more fails printing patterns with faded huge underlay.

Version 1.08.03 (unreleased) - september 16, 2011

Added Dutch version.

Version 1.08.02 (unreleased) - september 15, 2011

Added menu *Option/Behaviour/Watermark patterns with copyright information*.
Added copyright information in printout footer.
Added stitches/cm in pattern properties dialog and printout.
Now allows view as biscornu for embroidery motifs.

Version 1.08.01 (unreleased) - september 15, 2011

Added editor window icon to show pattern as a biscornu.
Completed Portuguese complete help.

Version 1.08 - september 13, 2011

Added feature *pick colours in underlay picture*.
Misc corrections and additions.

Version 1.07.03 (unreleased) - september 13, 2011

Corrected a crash saving charms having no picture.

Version 1.07.02 (unreleased) - september 13, 2011

Now changes Explorers Open with *text to myriaCross editor (version)*'.
Colours used for instant help messages are now skin dependent.
Added Portuguese complete help.

Version 1.07.01 (unreleased) - september 12, 2011

Added the ability to pick colours in underlay picture.
Corrected picture charms display (possibly missing pixels).
Added 3 charms in library *Fabulous Fibers*.
Added charms library *Sew Inspiring*.
Added website button for charm libraries having an URL.
Completed palette Bucilla (added 41 missing references).
Completed German version.

Version 1.07 - september 10, 2011

Added Cancel button in *My button* dialog.
Added *My charm* dialog to create picture charms.
Added charms library *Fabulous Fibers*.
Completed Portuguese version.

Version 1.06.04 (unreleased) - september 9, 2011

Added Cancel button in *My button* and *My Charm*.
Added the ability to run *myriaCrossEdt* form start menu.
No more opens Welcome window when autoloading a file.

Version 1.06.03 (unreleased) - september 9, 2011

Added edition tools palette in *my charm* dialog.
Added elliptic outline feature in *my charm* dialog.
Added auto crop to used area in *my charm* dialog.
Corrected br/fr charms library *Fabulous Fibers*.

Version 1.06.02 (unreleased) - september 8, 2011

Added button to save *my charm* definition (advanced users).
Added a way to add transparency in *my charm*.
Corrected typo *embrodeiry* in program description.
Now remembers last set grid ON style on exit when no grid.

Added skins *Grey* and *Yellow green*.
Added keyboard shortcuts Ctrl+ C/V/G/X.
Now handles realistic charms using pictures.
Now handles visible modifiable text in charms.
Now handles modifiable text as tooltip in charms.
Now ready to handle user-defined charms.
Added German version.

Version 1.05.05 (unreleased) - september 5, 2011

Added German language file.

Version 1.05.04 (unreleased) - september 4, 2011

Now handles user-defined charms.
No more loads realistic charm picture twice for display.
No more forgets resetting underlay fading when leaving a window.
Completed Portuguese version.

Version 1.05.03 (unreleased) - september 3, 2011

Now handles transparency in frame shapes.
Now handles realistic charms using pictures.
No more redraws after merging objects for conversion.

Version 1.05.02 (unreleased) - september 2, 2011

Added yellow green skin.
Added keyboard shortcut Ctrl+C to copy selection or object.
Added keyboard shortcut Ctrl+X to cut selection or object.
Added keyboard shortcut Ctrl+V to paste [as object].

Version 1.05.01 (unreleased) - september 2, 2011

Added grey skin.
Added keyboard shortcut Ctrl+G to switch grid display on/off.
Completed help files.
Completed Portuguese version.

Version 1.05 - september 1, 2011

Added option *Order palette* in the embroidery conversion dialog.
Added option *Realistic threads rendering* in the settings dialog.
Added charms library *Post-it* containing a modifiable text.
Added modifiable text as tooltip in charms library *Symbols*.
Added *Warning 10 mm* and *Warning 5 mm* in charms library *Symbols*.
Added centering options in the charms edition menu.
Added stitched fonts 03x06, 10x05, 11x05 and 14x12.
Added keyboard shortcut Ctrl+Z to undo last operation.
Now shows objects tooltip even if not in selection mode.

Version 1.04.06 (unreleased) - august 31, 2011

Added shortcut Ctrl+Z to undo last operation.
Now allows centering charms from the menu.
Now installs latest version of myriaCross Wheel OCX.
Now installs stdole2.tlb, missing on some systems.
Now sets appropriate mouse cursor shape VS function.

Version 1.04.05 (unreleased) - august 30, 2011

Now undoes charm text edition.
Enhanced tooltip texts in editor window.

Version 1.04.04 (unreleased) - august 29, 2011

Now allows editable [hidden] text in charms.
Added charms library Post-it.
Charms in Symbols library now contain a hidden text for tooltip.
Now shows objects tooltip even if not in selection mode.
Calling zoom menu no more hides selected object.
Hitting tab key hides the realistic thread textures list.
Clicking undo icon now keeps the mouse on this icon.
Changing colour did not always update user stitches.
Did not filter out forbidden characters when renaming a font.

Version 1.04.03 (unreleased) - august 27, 2011

Enhanced selection of realistic thread rendering texture.
Undo algorithm did not restore strings accurately.

No more adds multiple *My documents* folders in the file browser.

No more displays character & as _ in palette names.
No more forgets stitches at extreme right/bottom when adjusting selection.
No more chooses best thread for embroidery motifs - intended for quilting.
Corrected name localization for frames and mats.
Corrections in undo process.
Enhanced help files.
Enhanced Portuguese version.

Version 1.03.10 - august 11, 2011

Now closes CyberStitchers dialog on error loading TOC in diagnostic tool.
Added order posted index in the CyberStitchers dialog.
Added option *And come back* in the CyberStitchers dialog.
Now allows aborting batch conversion by pressing ESC key.
No more displays hidden or system folders in the file browser.
Now displays folder *My documents* in the file browser.
Added option *Close after selection* in the file browser.

Version 1.03.09 - august 10, 2011

Added language Português Brasileiro.
Added 3 frame styles by Wal D'Champs.
Enhanced support for localization.

Version 1.03.08 - august 8, 2011

Persistent warning windows can be closed by clicking them.
Now checks downloaded CyberStitchers patterns validity.
Added diagnostic tool for CyberStitchers admin.
Main timer events are far less CPU time consuming.
Size in centimeters and inches now appears in the new/properties dialogs.
Now prints size in centimeters and inches together with stitches.
Now includes frame when copying the pattern to the clipboard.
Now ready for handling password-protected compressed patterns.
No more uses a black background when generating thumbnails.
Added visual locator when creating quarters, backstitches, knots and beads.
Added menu *Open mode/File browser*.
Removed garbage collection: objects required for undo.
Corrections in undo process.
Added some frame shapes.

Version 1.03.07 - august 4, 2011

Added link to WDC Design in the websites panel.
Automatically chooses best thread for quilting depending on background brightness.

Version 1.03.06 - august 3, 2011

Folders and files:

- Saving sample patterns will now default to current save folder.
- Saving CyberStitchers patterns will now default to current save folder.
- Modifying a stitched font from the menu no more adds it to recent files list.
- Now resets project folder to *My documents* at startup if cleared - bug correction.

Texts:

- Moving over stitched fonts list switches the mouse wheel.
- Now remembers system/stitched font option.
- Added some stitched fonts.

Misc:

- Main timer events spend less time.
- Completed help files.

Version 1.03.05 - august 2, 2011

Now downloads 200x200 pixels picture as magnified preview.
Now maps text characters if required when selecting a stitched font.
Added some stitched fonts.

Changed shortcut clicks to temporary change stitch function:

- Ctrl + left click = create 1/4 stitch.
- Shift + left click = create half stitch.
- Alt + left click = create 3/4 stitch.
- Ctrl + Alt + left click = create petite stitch.
- Ctrl + right click = erase 1/4 stitch.
- Shift + right click = erase half stitch.
- Alt + right click = erase 3/4 stitch.
- Ctrl + Alt + right click = erase petite stitch.

Added embroidery background hue and brightness setting.

Version 1.03.04 - august 1, 2011

Added button *Clear the cache* in the CyberStitchers dialog.

No more allows saving downloaded patterns to this folder.

Added right-click menu for user-defined stitched fonts (rename, delete, modify).

Added garbage collection every second to delete unused objects.

Internal change: deleting an object clears parent window/object to none.

Enhanced pattern report: objects/windows ID prefixed *obj/win*.

Now slides panels smoothly by suspending timer events.

Version 1.03.03 - july 30, 2011

CyberStitchers dialog:

- Added logo and site link.
- Added preview magnifying.

Added static site links down panel.

Version 1.03.02 - july 30, 2011

Added menu *File/Clear this list*.

Now simplifies pathes displayed in recent files list.

Added button *Check for addition* in CyberStitchers dialog.

Now remembers display criteria in CyberStitchers dialog.

Added shortcut clicks to temporary change stitch function:

- (Left = create current type)
- Ctrl+Left = create 1/4 stitch
- Shift+Left = create 3/4 stitch
- Alt+Left = create Petite stitch
- (Right = erase current type)
- Ctrl+Right = erase 1/4 stitch
- Shift+Right = erase 3/4 stitch
- Alt+Right = erase 1/4 stitch

Version 1.03.01 - july 29, 2011

Removed web sites panel - not fully working.

Added menu *File/Open more*.

Moved *File/Open a sample* to *File/Open more/Open a sample pattern*.

Added menu *File/Open more/Open a pattern from CyberStitchers*.

Moved *File/Open clipboard content* to *File/Open more*.

Version 1.03 - july 27, 2011

Added menu *Tools/New stitched font*.

Added stitched fonts in the text panel.

Now uses dynamic web sites panel.

Added 4 sample patterns from Carinne.

Corrected a crash with palette when pasting.

Version 1.02 - july 23, 2011

Added 4 mat styles.

Added web sites panel.

Version 1.01 - july 22, 2011

Renamed *Mount* as *Mat*.

Added menu *Option/Behaviour/Move properties when choosing frame or mat*.

Added mat styles (countries).

Now displays a wait message while deleting unused colours.

Now displays a wait message while merging identical colours.

Now displays a warning message when trying to auto backstitch an object.

Version 1.00.99 - july 21, 2011

Added mount styles *Donkey,Cow,Cat,Horse2,Diamond3,Square7,Triangle6*.

Mount style selection preview now uses current colours.

Frame and mount style selection dialogs now allow not auto closing.

Now displays information when moving over an object in selection mode.

Now logs most class functions calls in debug mode.

Now loads *StitchCraft* charts with more than 255 colours.

Now aborts save if size or colour count is off target format range.

Version 1.00.98 - july 20, 2011

Added menu *Help/I want more*.

Added frame styles *Wooden 3 to 8*.

Added error handler for print process.

- Some printers require a file input, canceling raises an error.

Now ensures frame picture is persistent in preview.

Now only shows localized *My motifs* libraries.

Corrected a bug not centering items preview when more than 1 window.

- Each window now handles its own stitch/motif/charm/text definition.
- Now handles up to 32 pattern windows assuming there is enough memory.

Version 1.00.97 - july 19, 2011

Added folder selection dialogs in the batch conversion tool.

Added menu *Options/Behaviour/Invert mouse wheel direction for zooms*.

The pattern report dialog is now localized.

Corrected a bug not clearing frame style when closing a pattern.

Corrected a bug losing owner window settings when loading a .mcpat file.

Corrected a display bug with quarter stitches when set to no grid lines.

Version 1.00.96 - july 18, 2011

Added frame shape feature in the properties dialog.

Added properties icon right-click menu.

Added some mount shapes.

Added *Advanced user information* shortcut in Windows Start/Programs menu.

Removed useless setting for pattern window outlines.

Removed *Copy* button in full view window.

Copying pattern preview to clipboard now includes mount shape.

No more loses zoom factor after colours ordering.

No more ghost grid lines when set to none.

No more considers full view window is open when closing with the X.

No more forgets refreshing when opening full view window again.

No more fades out before asking for save when leaving from file menu.

Version 1.00.95 - july 15, 2011

Files in folder are considered temporary.

(Vista opens zips in \Microsoft\Windows\Temporary Internet Files\Content.IE5)

Renamed *Cutting shape* as *Mount shape*.

Completed *Rosace* thread palette.

No more autoloads a pattern from the explorer when a dialog is open.

Installer option *Run once installed* now remembered upon installs.

Added installer option *Check for updates*, also remembered upon installs.

Version 1.00.94 - july 12, 2011

Enhanced batch conversion tool:

- Selecting source folder shows matching files.
 - Now reports file size difference after conversion.
- Did not save cutting shape defaults in .mcpat patterns.
Corrected a crash when defining a new pattern.

Version 1.00.93 - july 11, 2011

- Added menu *Options/Batch conversion tool*.
Added cutting shape feature in the properties dialog.
- Up to 8 polygonal regions per shape.
- Corrected a bug not changing object size on pattern size change.
Corrected a bug modifying rulers on full view redraw.

Version 1.00.92 - july 8, 2011

- Implemented Rosace 2-character fixed symbol system.
Now creates thumbnail when saving as Cross Stitch Pro.

Version 1.00.91 - july 7, 2011

- Added menu *Options/Behaviour/Activate hot keys for menus and buttons*.
Added menu *Options/Startup/Fade in (and out on exit)*.
Added setting option *Display stitch points*.
Added template to create new patterns from the explorer.
Now loads .cmd quilting files (Compuquilter).
Now loads .cqp quilting files (Compuquilter).
Now loads .hqf quilting files (HQ Pro-Stitcher).
Now loads .iqp quilting files (Intelliquilter).
Now loads .mqr quilting files (Machine Quilting Robot).
Now loads .pat quilting files (ABM AutoPilot).
Now loads .qli quilting files (Statler Stitcher).
Now loads .ssd quilting files (Side Saddle).
Now loads .txt quilting files (PC Quilter).
Corrected a possible bug losing current colour.

Version 1.00.90 - june 30, 2011

- Reduced height of main toolbar.
Corrected a crash printing patterns.

Version 1.00.89 - june 29, 2011

- Rulers now graduated every 10 stitches.
Now allows opening files in archives.
Corrected a crash loading embroidery.
Smoother resizing of available colours panel.
Warning windows no more hide whole view windows.

Version 1.00.88 - june 28, 2011

- Reduced icons area and added shadows in editor window.
No more checks if open pictures are read-only.
Corrected a crash after saving as PCStitch 9.
Added option *Editor window outlines* in the settings dialog.

Version 1.00.87 - june 27, 2011

- Changed internet help to local help.
Now allows saving to PCStitch 9 patterns.
Now allows saving to read-only PCStitch 9 patterns.
Added *My motif* in the *Fill with a motif* dialog.
Added filling with motif using petite stitches.
Added menu *Options/Behaviour/Open file in archive from the explorer*.
- Sub menu *Always as read-only (no save)*.
 - Sub menu *As local copy if not protected*.
- No more adds files in archive to recent file list.

Version 1.00.86 - june 25, 2011

Corrected a lot of possible crashes due to a Windows bug:

- Not activating next child window when closing maximized child window.

Corrected right justified texts creation.

Added *I no more need this help* in instant help windows to end this feature.

No more disallows mouse wheel zoom in chained backstitch creation mode.

No more disallows mouse wheel zoom in symmetry axis selection mode.

Version 1.00.85 - june 24, 2011

Introduced instant help popup windows.

Now allows setting CS/ME background display separately.

Now loads AutoCAD .dxf files as embroidery.

Corrected symbol colour for TR/BL/BR quarter stitches.

Now updates window text when changing pattern title.

Internal changes to avoid file access errors.

Version 1.00.84 - june 22, 2011

Added the measurement in current units or in stitches.

Moved all display options to a dialog.

Version 1.00.83 - june 21, 2011

Rulers:

- Now allows hiding them.
- Added display style *Black and white*.
- Added display style *Yellow ribbon*.
- Added selection of rulers origin.
- Now uses a small font for texts.
- Enhanced measurement accuracy.

Corrected displayed X,Y position in embroidery motifs.

Internal changes to avoid file access errors.

Version 1.00.82 - june 20, 2011

Enhanced rendering with symbols for small zooms.

- Colour block + symbol: ignore symbol.
- Black symbol only: render colour brightness.

Added font preview when scrolling symbol font list.

Added menu *Options/Behaviour/Display rulers*.

Version 1.00.81 - june 18, 2011

Now allows saving to read-only PCStitch 7 patterns.

Now allows saving to read-only WinStitch 2009 patterns.

Corrected a bug allowing read-only removal for non native patterns.

Internal changes to avoid file access errors.

Corrected erroneous cases displaying the grid.

Corrected a potential crash displaying embroidery grid.

Corrected a crash deleting user-defined palettes.

Copy to clipboard now reports if failed.

Version 1.00.80 - june 17, 2011

Interface:

- Sometime did not set good colour for needle cursor shape.
- Did not check grid style in menu for bold lines every 10 stitches.
- Added menu *Options/Display grid/In embroidery motifs/Display grid above*.
- Corrected a potential crash selecting objects.

Display:

- Enhanced contrast of thin/bold grid lines.
- Did not use blended colour for backstitches in all display modes.
- Did not use blended colour for french knots.
- Did not use good colour for symbols in all display modes.

Print :

- Enhanced contrast and increased width of thin/bold grid lines.
- Now prints grid even though not displayed due to small zoom.
- Now prints grid over cross stitches and below over stitches.
- Now prints a preview of each blend colour when required.
- Corrected scale of printed center mark.

Version 1.00.79 - june 16, 2011

Menu *Options/Display grid/...* is less confusing.
 Added menu *File/Copy to clipboard*.
 Added menu *Options/Display grid/Display center*.
 Completed .mcpat patterns loading debug information.
 Corrected a bug zooming in/out embroidery motifs.

Version 1.00.78 - june 15, 2011

Added menu *Options/Behaviour/Display cross stitches/As black symbols*.
 Added button *Suggest best contrast* in pattern properties dialog.
 Changed backstitch width (15, 20, 25 or 30% of grid square width).
 Added by colour backstitch style setting in the colour properties panel.
 Added option *Change style* in the backstitch edit menu.
 Now displays symbols for French knots.
 Now displays backstitch styles.
 Changed *Printed by myriaCross editor* to a picture logo.

Version 1.00.77 - june 14, 2011

Slightly changed .mcpat patterns decompression method.
 Added .mcpat patterns loading debug information.
 - (to \myriaCrossEdt\Debug.txt)
 Added menu *Options/Behaviour/Display grid/For cross stitch patterns*.
 Added menu *Options/Behaviour/Display grid/For embroidery motifs*.
 Added menu *Options/Behaviour/Display outline for beads*.
 Moved menu *Options/Behaviour/Display jumps* to *Options/Behaviour/Display embroidery stitches*.
 Added menu *Options/Behaviour/Display embroidery stitches/Display commands*.
 Added sewing simulation mode (slow redraw) for embroidery motifs.
 Typos in French language file.

Version 1.00.76 - june 11, 2011

Now easier to move selections.
 Corrected undo making or leaving a selection.
 - (undoing *move selection* did not restore pattern)
 Corrected undo making object with selection.
 - (undoing sequence *select/flip/object* crashed)
 Enhanced chaining when auto backstitching (minimum stitches).
 Changing units no more changes my button colour.
 Added selection tool menu option *Global change*.

Version 1.00.75 - june 9, 2011

Added handling for time-limited registration key.
 Now easier to move objects.

Version 1.00.74 - june 8, 2011

Added option *Behaviour/Display backstitches.../style*.
 Added option *Behaviour/Display embroidery stitches.../width*.
 French knots diameter now slightly greater than backstitches width.

Version 1.00.73 - june 7, 2011

Added option *Behaviour/Display backstitches....*
 Now displays and prints backstitches with same width.
 Leaving print dialog no more pops unwanted window.
 Now resizes 50% underlay picture >= 3000 pixels to avoid memory crash.

Version 1.00.72 - june 6, 2011

Underlay picture dialog:

- Added 1/2 to 1/10 pixels per stitch.
- Added button *Picture from clipboard*.

Corrected computation of elapsed time.

Could not load PCStitch 9 patterns containing multiline texts.

Cascade windows when converting to embroidery.

Version 1.00.71 - june 4, 2011

Added open filter *Supported cross stitch files*.

Added open filter *Supported embroidery files*.

Now forces floating messages window topmost.

Now prints underlay picture.

Version 1.00.70 - june 3, 2011

Added option *Behaviour/Adjust selection area to actual content*.

Pan and zoom using mouse wheel no more loses the hotspot.

Open picture:

- Changed *Colours* to *Actual colours*.
- Added setting *Possible colours*.

Corrected a crash adding a colour when palette is scrolled.

Corrected a crash merging identical colours when having sub objects.

Corrected saving to Pattern Maker (information font).

Version 1.00.69 - june 1, 2011

Now allows using mouse wheel in most panels.

Corrected specialty stitches Herringbone 1 and 2.

Corrected a crash using mouse wheel while pattern window is reduced.

Version 1.00.68 - may 31, 2011

Now displays stitch name in specialty stitches panel.

Changing pattern fabric colour now refreshes panels.

Added specialty stitches:

- Button Hole 1 and 2.
- Crossed Corners.
- Flat Stitch.
- Herringbone 1 and 2.
- Queen Stitch.
- Tied Down Cross.
- Triangle Stitch.
- Van Dyke Stitch.

Corrected a crash closing panels when closing patterns.

Version 1.00.67 - may 30, 2011

Now handles [filled] ellipses in charms definition.

Added Permin magnolia and rose wood buttons.

Added palette Navia Wool.

Version 1.00.66 - may 27, 2011

Now creates smaller .mcpat files using 7zip compression.

Updated Permin fabric palettes.

Version 1.00.65 - may 26, 2011

Enhanced specialty stitches panel to display 15x15 stitches.

Added specialty stitches:

- Cross 1/2x1 left, 1/2x1 right, 1x1/2 top, 1x1/2 bottom.
- Cross 1x2, 2x1, 2x2.
- Frame Stitch, Leaf Stitch 1 and 2.

New patterns now named New1, ... Newn.

Corrected a crash loading my library.

Version 1.00.64 - may 25, 2011

Now resets the autosave timer when saving in myriaCross format.
Added *Close this menu* in auto backstitch menu.
Now allows no holes in my button dialog.
Some functions did not close panels.
Corrected a bug not resetting read-only password on open.
Corrected a bug creating file *.plx* in fabrics folder.
Corrected a crash saving 1 stitch wide patterns.

Version 1.00.63 - may 23, 2011

Completed palette SJ Designs 14/0 Glass Seed Beads.
Added menu option *Behaviour/Slide panels to open or close them*.
Added decorating picture in the underlay dialog.
My button:

- Changing units no more resets default settings.
- Now allows both hollow and emboss shapes.
- Now allows far more colours.

Version 1.00.62 - may 20, 2011

Added decorating picture in the information dialog.
Added fabric HSL colour picker in properties dialog.
Added palette SJ Designs 11/0 Glass Seed Beads.
Added palette SJ Designs 14/0 Glass Seed Beads.
Now shows accurate embroidery fabric colour pointed by the mouse.
Slightly reduced backstitches width.
Enhanced rendering contrast.

Version 1.00.61 - may 19, 2011

Added missing rich text component in the installer.
Changed background logo format for smaller installer.
Enhanced rendering of petite stitches, knots and beads.
Corrected sorting of fabric palettes in properties dialog.
Corrected a bug generating invalid Pattern Maker files.

Version 1.00.60 - may 17, 2011

Added background logo.
Added menu option *Behaviour/Display full path of recent files*.
Improved detection of backstitches and embroidery stitches.
Added backstitches edition:

- Right click on stitch for menu (Delete, Use current colour).
- Ctrl + right click to select stitch for endpoints edition only.

Added single colour and all colours auto backstitch modes.
Added information in the embroidery stitches histogram.
Corrected a bug not retrieving user defined order for edition.
Corrected a bug in display when using mouse wheel.
Corrected a crash when opening charms panel.
Fixed tool tip localization of close button in text panel.

Version 1.00.59 - may 13, 2011

Added display styles for cross stitches.
Added palette menu option *User defined order*.
Added palette menu option *Edit user defined order*.
Stores user defined order in pattern files.
Increased speed and enhanced rendering with 3D effects 2 and 3.
Corrected a bug that could not load patterns containing objects.
Corrected a crash when merging an object in 3D effect cross mode.

Version 1.00.58 - may 12, 2011

Added palette menu option *Order palette*.

Added selection menu option *Save as motif*.
Added specialty stitches menu options *Rename, Delete*.
Added motifs menu options *Rename, Delete, Delete library*.
Added *My button* dialog when right-clicking on charms icon.
Added histogram icon and dialog in embroidery motifs.
Changed button *Copy* to *Copy to clipboard* in the floss usage dialog.
Corrected a potential crash when converting beads to embroidery stitches.
Now disallows creating specialty stitches greater than 15x15 stitches.
Now shows position in embroidery motifs using current units.

Version 1.00.57 - may 9, 2011

Added menu *Options/Measurement units*.
Added warning message while preparing print.
Added count of printable stitches V. count of pages.
Added size of printable stitches V. count of pages.
Enhanced printing of floss usage.
Added selection menu option *Save as specialty stitch*.
Updated web help: palette management.

Version 1.00.56 - may 6, 2011

Added display styles for embroidery stitches.
Added zoom menu option *Whole pattern*.
Added palette menu option *Floss usage*.
Added warning message when loading a file.
Now displays pattern window using maximum room.
Now displays position in mm for embroidery motifs.
No more displays/prints unwanted symmetry axis.
No more slows down chaining backstitches.
No more slows down selecting symmetry axis.
Increased speed finding colour under the mouse.
Corrected a fatal bug when making null selection.
Corrected a fatal bug when pressing Alt key.
Corrected a fatal bug when launching print dialog.
Corrected a bug not setting symbols colour.

Version 1.00.55 - may 4, 2011

Corrected retrieval of colours in objects.
Added checking for objects palettes consistency on loading.
Now shows thread usage in pattern report.
Now shows thread/bead usage in pattern printout.
Increased backstitches width in printouts.

Version 1.00.54 - may 3, 2011

Added menu *Options/Behaviour/Auto select current colour among available colours*.
Corrected saving as Cross Stitch Pro 1.33 .xsp files.
Corrected saving as Pattern Maker 3 .xsd files.
Corrected saving as StitchCraft 3 .scc files.
Now disallows merging colours in embroidery motifs.
Now accurately merges colours in objects.
Now shows symbol in pattern window colour preview.
Now shows embroidery stitches in pattern report.
Moved colour property *Show blends* to palette menu *Display blended colours*.
Moved colour property *Show symbols* to palette menu *Display colours symbols*.
Missing characters (28) now appear in symbols selection picture.
Changed buttons to sliders in stitches/motifs/charms panels.

Version 1.00.53 - may 2, 2011

Pattern properties dialog:
 Corrected a bug retrieving fabric.
 Now allows increasing pattern size.

Changing pattern size disables symmetry.

Added 6 preset palettes.

Making selections:

Corrected a bug drawing selection symbols.

Enhanced area and object selection boxes.

Now handles right-click on an unselected object.

Opening pictures/Underlay pictures:

Now handles bmp, gif, ico, jpg, pcx, png, psd, tga, tif.

Now allows setting contrast and brightness from -70% to +70%.

Added underlay right-click menu to fade picture with background.

Successive zoom/pan with mouse wheel now undone as a group.

Added palette menu option *Merge identical colours*.

Version 1.00.52 - april 29, 2011

Now zooms in/out with mouse wheel in pattern window.

No more triggers events with middle mouse button.

Added symmetry menu option *Display axis*.

Now resets mouse shape changing symmetry axis in backstitch mode.

Now undoes symmetry mode changes.

Removed bead entries from fill with motif palettes.

Added embroidery conversion option *Convert beads*.

Version 1.00.51 - april 28, 2011

Added picture settings: colourize, contrast and brightness.

Added symmetrical design for crosses, backstitches, French knots and beads.

Increased size of pseudo palette for better colours.

Loaded pictures now use default title, author, copyright, website, keywords.

Now displays a message while loading a picture.

Added button *Ignore* when leaving pattern is asked by the user.

Added sample pattern (the king) made with this editor from a photo.

Version 1.00.50 - april 27, 2011

Corrected a fatal bug when changing a picture setting.

Main colour preview is button-like in colour properties dialog.

Activating the available colours panel now closes other panels on left side.

Closing specialty/motif/charm/text panels reverts to selection mode.

Clicking specialty/motif/charm/text icon twice toggles panel visibility on/off.

Now disables most functions in picture setting mode.

Now resets undo then opens colour-related panels after picture setting is done.

Added option *Set a symbol to colours that have none* in the symbols menu.

Added menu *File/Open clipboard content*.

Now updates whole view window when language changes.

Version 1.00.49 - april 26, 2011

Did not find colour for knots and beads in grid squares.

Enhanced windows update when language changes.

Now opens .pat files regardless of PCStitch/Pattern Maker setting.

Corrected bug making *Open with* explorer action fail.

Now allows *Open with* explorer action with any handled file.

Now displays loaded pictures at a lower zoom.

Added settings when loading a picture.

Added 3 sample patterns made with this editor from photos.

Version 1.00.48 - april 23, 2011

Corrected bugs displaying huge palettes.

Corrected a bug creating stitch combination pictures.

Now opens picture files as patterns (bmp, gif, jpg).

Whole view redraws are now delayed to allow window resizing.

Version 1.00.47 - april 22, 2011

Now displays involved pattern name in the auto-save window.
Corrected a fatal error while setting pattern window title.
Now leaves backstitch creation chain mode when changing function.
No more requires to keep Ctrl key pressed for chained backstitches.
Did not close text panel when closing pattern.
Now asks before increasing pattern size for item insertion.

Version 1.00.46 - april 21, 2011

Corrected colour picker.
Now loads Kreuz patterns (.krz).
Now loads PixelHobby designs (.phd).
Now loads StitchCraft charts (.scc).
Now loads X-Stitch/Jane Greenoff/Stitch R-XP patterns (.pt5, .pt6, .pt7, .jgg).
Now saves as Cross Stitch Pro 1.33 patterns (.xsp).
Now saves as PixelHobby 1 designs (.phd).
Now saves as StitchCraft 3 charts (.scc).

Version 1.00.45 - april 20, 2011

Embroidery motifs default function is colour picker.
Undoing colour change refreshes highlighting.
Corrected embroidery motifs saving message.
Corrected embroidery motifs printed label.
Now loads Pattern Maker .pat and .xsd charts.
Now saves as Pattern Maker 3 .xsd charts.

Version 1.00.44 - april 19, 2011

Now redraws only one time when converting whole palette or undoing it.
Changing current colour now highlights it if highlighting is enabled.
Corrected colour picker for colours in objects.
Now loads machine embroidery files:

- Tajima files (.dst)
- Elna/Singer files (.emd)
- Melco files (.exp)
- Janome files (.jef, .jef+, .sew)
- Pfaff files (.ksm, .pcd, .pcm, .pcq, .pcs, .vp3)
- Brother, Baby Lock files (.pes)
- Siruba files (.plt)
- Pulse files (.psf)
- Viking Designer files (.shv)
- Data-Stitch files (.stx)
- Singer files (.xxx)
- Toyota files (.10o)
- Thredworks files (.thr)

Version 1.00.43 - april 18, 2011

Completed most messages related to loading and saving.
Added pixels/stitch information in underlay picture dialog.
Added bottom-right shadow in pattern/motif window.
Enhanced display of petite stitches.
Added menu *Options/Behaviour/Display jump stitches*.
Added filling and colour picker tools.
Added chained backstitches mode.
Closing a pattern/motif only allows saving it in .mcpat format.
Could not load PCStitch 9 patterns containing images in notes.
Started web help.

Version 1.00.42 - april 15, 2011

Corrected infinite loop when updating at startup.
Corrected a fatal bug when choosing a tiny underlay picture.
Underlay settings can now be undone.

Full view icon is now grey when already open.
Full view windows should now stay on top when required.
Added zoom popup menu in pattern window.
Generic Fabric Colours palette appeared twice in pattern properties.
Improved text input behaviour in pattern properties dialog.
Changed label for generic/specified colour palettes.

Version 1.00.41 - april 14, 2011

Corrected a fatal bug when printing embroidery patterns.
Corrected a bug creating unwanted stitch when pasting as object.
Move buttons stayed disabled in underlay picture dialog.
Added fine moves (pixels) in underlay picture dialog.
Increased font size range up to 72 in text panel.
Pattern window icons are now grey when unavailable.
Embroidery pattern window title is now *Motif:*
Now refreshes only involved windows when changing a behaviour.
Now restores application window when minimized and closing is requested.
Now restores application window when minimized and reminding to save.

Version 1.00.40 - april 13, 2011

Simplified and improved setting of underlay picture.
Added settings dialog for conversion to embroidery.
Added menu *Options/Behaviour/Display embroidery with 3D effect*.
Corrected size and content generated by conversion.
Remind saving will not occur if a dialog is open.
Implemented checking for update [at startup].
Whole view removed the pattern modified flag.

Version 1.00.39 - april 12, 2011

Now shows underlay picture in whole pattern view.
Corrected fabric palette Zweigart Bellana 10ct - 8fl/cm.
Added the ability to convert patterns to embroidery.
Increased speed drawing backstitches.

Version 1.00.38 - april 11, 2011

Either pattern width or height cannot be more than 16,000 stitches.
Now always shows specialty stitch/motif/charm/text floating preview when required.
The text entry area now mirrors selected justification.
Added text options *Italic*, *Low contrast* and *High contrast*.
Saving to either system or application folder is no more authorized.
Added the ability to set/unset myriaCross patterns as read-only.
Added the ability to place and adjust an underlay picture in patterns.
Now loads WinStitch charts and motifs and saves to WinStitch 2009 charts.
Added fabric palette Zweigart Bellana 10ct - 8fl/cm.
